

A SIMPLE COLOUR CODED SYSTEM FOR THE MOST EFFICIENT AND CONSISTENT SANDING CYCLE

Gone are the days of working through a number of different grits to achieve a smooth surface finish with abrasives that all look the same!

Cyclonic® is the new and unique “all-in-one” sanding system from Norton, which is colour-coded by application, for quick and easy product selection in the bodyshop.

The sanding range, consisting of discs, rolls and accessories, has been specifically engineered using Norton Cyclonic technology and a soft foam backing for finer grits. This advancement in design ensures that each sanding stage gives the best finish for the next step; minimising sanding time, increasing productivity, and giving an overall perfect surface finish prior to painting.

FASTER

Minimise your sanding time with four easy sanding steps.

Optional application stages for heavy duty or final finishing operations when necessary.

SIMPLE

Colour coded by application for quick and easy selection.

PERFECT SURFACE FINISH

Achieved using the latest Norton Cyclonic dust extraction system combined with a soft foam backing.

A SIMPLE, COLOUR CODED SANDING SYSTEM

THE NORTON CYCLONIC SANDING SYSTEM CONSISTS OF FOUR KEY SANDING STAGES TO ACHIEVE THE PERFECT SURFACE FINISH

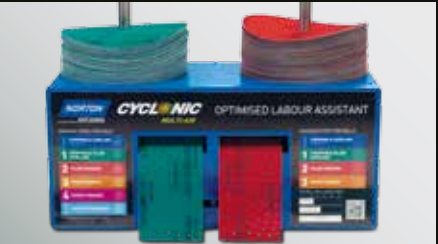

Optional application stages for heavy duty or final finishing operations are also available.

DISCS
Ø 150 mm CYCLONIC PERFORATION
Colour coded discs with Self-Grip and micro Soft-Touch backing for finishing applications. Accessories also available.

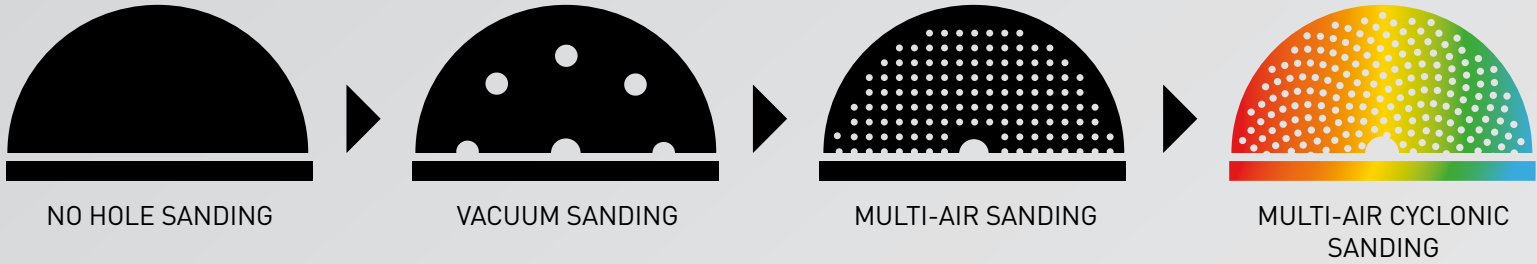

PRE-CUT ROLLS
72 x12m CYCLONIC PERFORATION
Pre-cut rolls with Self-Grip backing available in one dimension to fit all sanding blocks; 70 x 125mm, 70 x 198mm and 70 x 420mm.

DISPENSER
Storage unit for organising and dispensing the full range of discs and rolls for quick and easy selection.
Multiple units can be fixed together to store the whole range.

IMPROVED PERFORMANCE

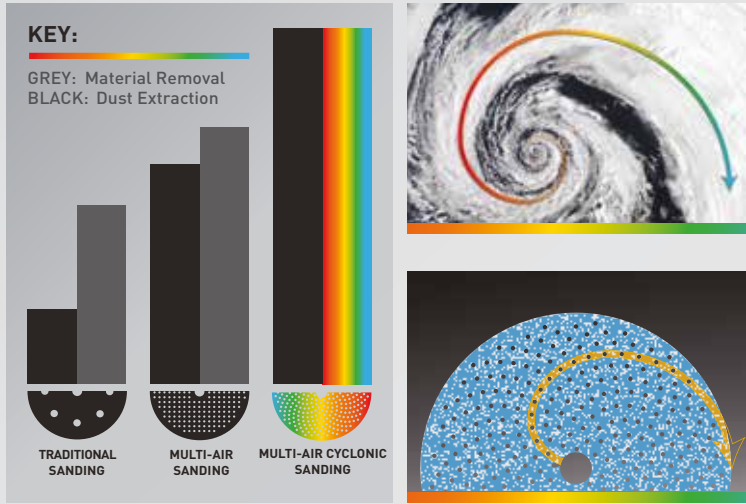

A NATURAL PROGRESSION IN DUST EXTRACTION TECHNOLOGY

FASTER SANDING

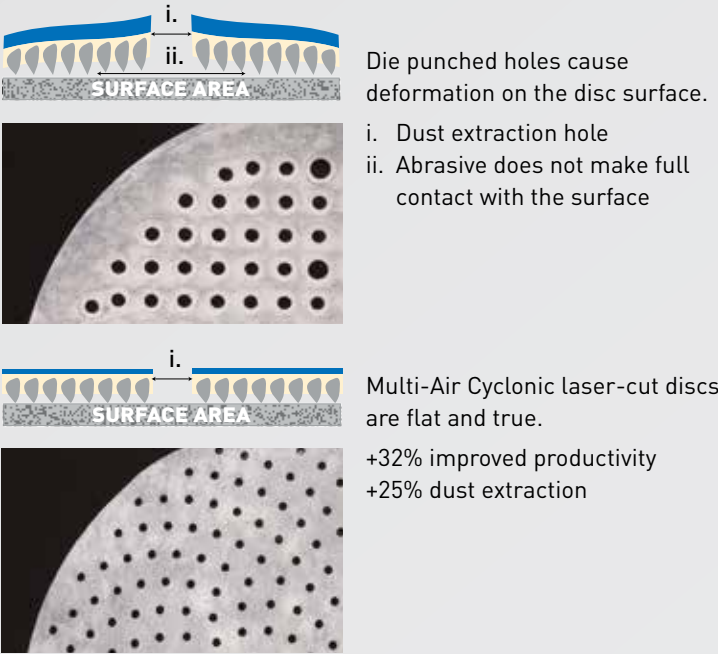

Thanks to the unique hole pattern, Norton Cyclonic improves productivity by up to 32% compared to conventional multi-hole sanding discs. With a 25% increase in dust extraction, the new hole configuration is based on the same science as cyclone formation, for the most powerful air movement.

Use with a Multi-Air back-up pad for the best performance.

FLATTER DISCS FOR CLOSER SANDING

Thanks to new laser cutting technology, holes are cut into the disc, not punched. This precise cutting technique means discs are flatter, dust extraction is better and the abrasive surface area is increased for a more consistent scratch pattern and improved surface finish throughout the life of the disc.

CONSISTENT SANDING RESULTS

Work smarter not harder thanks to the Norton ceramic grain which does all the hard work!

A superior cut and longer life than conventional grain, ceramics are sharper, cut cooler and wear more evenly, providing consistent sanding results and a more uniform scratch pattern on paint, primer, clear coat, aluminium and composites.

The new anti-clogging No-fil® formula combined with A975 sandpaper allows the disc to work for longer.

- WITHOUT NO-FIL®**
- Immediate balling up of dust particles
 - Creates scratches
- WITH NO-FIL®**
- Dust particles remain separate
 - Easier dust extraction

ACHIEVE THE PERFECT SURFACE FINISH

For finishing applications, finer step discs have a thin foam backing which provides a more comfortable sanding experience and gives a wider contact area as the foam adapts to surface curves and contours for a smooth, consistent finish. All discs and rolls are self-gripping for a fast and easy process from start to finish.

Discs with foam backing provide shallow scratches for quicker, easier polishing.

Achieve a more uniform scratch pattern, with no 'digging' on the surface and edges during sanding. Micro Soft-Touch provides fast levelling of primer orange peel and an excellent surface finish.

Conforms to curved and contoured surfaces ensuring maximum contact and surface finishing.
