Description

Norton offers a range of products for portable snagging foundry applications. Type 01 straight wheels are used on portable machines and Type 06 and 11 cup wheels on vertical grinders. Since finish tolerances are not usually critical, coarse, durable wheels are used with grit sizes ranging from 16 to 24.

Features & Benefits

Low purity black silicon carbide abrasive

Harder and more friable than aluminium type abrasives

Suitable for roughing operations in coarse grit and resinoid wheels

Ideal for grinding and sharpening applications on metal carbide and nonferrous metals

Ideal for applications with no technical requirement
