INVINCIBLE BLADES FROM NORTON CLIPPER

HEROES ARE MADE BY THE TOOLS THEY USE

HE'S BACK AND HE'S BIGGER AND STRONGER THAN EVER!!!

Mr. Invincible is back, and he's stronger and faster than ever before, with the addition of the 180mm and 230mm diamond blades. These larger blades bring the same heroic combination of powerful performance and super safe design, making them ready to tackle even bigger challenges. Expand your toolkit with these new sizes and experience how the invincible blades makes light work of every building task.

THE SECRET INGREDIENTS...

The secret to the blade's super-safe segments is the newly advanced, next generation iHD auto attachment technology, which forms an 'invincible' bond between the diamond segment and steel core.

During the blade's manufacturing, Saint-Gobain's Next Generation IHD technology auto attaches the segment of the blade directly to the steel centre via infiltration. The cohesive power of this bond offers an ultra-strong resistance of the segments; your safety is assured.

PRINCIPLES OF INVINCIBLE

1

ULTRA SAFE

Second generation iHD autoattachment technology makes blade segments Invincible and the blade itself, incredibly safe to use.

2

MULTI-MATERIALS

A multi-material blade which can be used on all building materials.

3

MULTI-MACHINES

Blade specially developed to be used on cord AND battery powered angle grinders, providing exceptional cutting power.

4

SPEED AND POWER

The fastest blade in our range!
