

Sustainable Supply Chain has a new leading player, **YOU**

The SEAM program guarantees that SEAM members, all from within the abrasive supply chain, manufacture, process, supply, distribute abrasives according to the sustainability standards with regards to environmental efficiency (waste, energy, resource), health and safety, quality and innovative production processes.

We are SEAM and we are working to improve your sustainability performance.

The SEAM program is a call for action from the European abrasives industry to make a difference at the local, European and global levels.

THE EUROPEAN ABRASIVE INDUSTRY, THINKING FORWARD

Striving as a business to commit to continually improve its production processes.

When it comes to standards of **quality, safety, performance and environment**, we have always been at the forefront.

Today, **sustainability** has become a minimum requirement for business, but it is also a catalyst for **increased efficiency** and improved performance.

By **embracing environmental**, social and economic sustainability, we can maintain our position and **lead our industry forward**.

“

The SEAM Program is based on the principles of sustainability and has for objective to stimulate continuous improvements
