

SUPER•CUT

GLASS AND CERAMIC DIVISION

New Layered Dressing Sticks

- *Specially formulated for use with Super-Cut's range of new high speed wheels for automotive glass grinding*
- *These sticks are manufactured by an innovative process that is designed to target the multi-layer technology wheels to achieve precision dressing of the new wheel designs. Each layer of the dressing stick is tailored to suit the corresponding layer in the wheel to achieve optimum diamond exposure and grinding speeds*
- *Several formulations are available depending on the wheel specification*
- *Available for 3mm, 4mm, 5mm and 6mm glass thicknesses*
- *Various sizes suitable for auto stoning on Bystronic Bando and Benteler machines are available*
