

DID YOU KNOW ...
THAT FIBER DISCS ARE THE MOST HEAVY-DUTY OF COATED ABRASIVES DISCS?

MARKETS: Metal fab, metal finishing, construction and MRO.

MACHINES:  Used on right angle grinders, pneumatic and air. Common machine manufacturers are Milwaukee, Metabo, Hilti, Makita, DeWalt, Dynabrade among others.

TIERS: **BEST** – Norton Blaze, Norton Red Heat **BETTER** – Norton BlueFire **GOOD** – Norton Neon **OPP** – Norton Metal

APPLICATIONS: Designed for anything from heavy stock removal to surface finishing of carbon steel, stainless steel or aluminum.

CARBON STEEL – normally a fiber disc is used to remove a weld and prepare a work piece for its next step in production – typical accounts include propane tanks, military vehicles, farm equipment heavy stock removal to surface blending

STAINLESS STEEL – when working on stainless it's important to remember there is more heat generated – typical accounts include food processing, pressure vessels, hot water tanks, ship & rail containers

ALUMINUM – aluminum behaves differently from carbon and stainless in that it can load during grinding – typical accounts include trailers, dry boxes, fencing, boat repair
