HAND-HELD CORE DRILL RIG

HDR600C HAND-HELD CORE DRILL RIG

Whether the customer's core drill application requires hand-held or one in a stand, the new HDR600C is the perfect solution for your rental fleet. This new rig package provides the rental market with a strong, stable-performing hand-held core drill and sturdy rig stand.

The single-speed drill features "smart electronics" motor protection and safety clutch for safe operation, which means no overheating of electrical parts. Geared at 940 RPMs, there is plenty of power to easily spin a 4" bit by hand and a 6" with the stand.

When you need a core drill that can cover the basics but also maximize your return on investment, the HDR600C is a great solution.
