

UNIQUELY DESIGNED FOUR FINAL FINISHING

- 1** Durable
- 2** Conformable
- 3** Flexible
- 4** Versatile

The strong polyester film backing on Norton Q275 discs provides uncommon strength and remarkable versatility with the flexibility to conform to contours and uneven surfaces. These premium, aluminum oxide abrasive and water-based stearate discs sand flat, resist loading, last longer, and cut consistently for maximum productivity with a uniform, precise finish.

KEY APPLICATIONS

For use on random orbital and rotary sanders across many industries and substrates:

- prepping and finishing metal
- stripping and preparing primed and painted surfaces
- sanding plastics, composites, and all gel coat and body filler compounds
- sanding bare wood

FEATURES & BENEFITS

GOOD CHOICE FOR DRY SANDING APPLICATIONS, ESPECIALLY UNEVEN, HARD-TO-SAND SURFACES.

- Sharp, P-graded, heat-treated premium aluminum oxide grain ensures faster yet cooler cut for a longer life
- 3-mil polyester film backing delivers unmatched durability and tear strength with exceptional flatness for a flawless surface finish and reduced leveling and rework
- Water-based stearate (No-Fil) coating provides maximum load resistance when sanding dry for extended life without clogging
- NorGrip (hook and loop) back allows quick and easy attachment and clean removal
- Wide grit range for maximum application and substrate usage, including 800 grit and finer for ultra-fine finishing
