

WHITE SCREEN DRIVER STAIN APPLICATION PAD

IMPROVED DESIGN!

The highly-flexible non-woven pad design is ideal for both screen disc sanding and stain buffing applications. Softer design holds stain more consistently, allowing for more uniform distribution during the buffing application. Increased pad flexibility holds screen better and allows for sanding 100% of the surface.

FEATURES

- Higher flexibility
- Softer density

BENEFITS

- Allows screen to conform to irregularities in the floor to ensure 100% abrasion rate
- Prevents screen from scratching too deep into the finish/wood.
- Absorbs and spreads stain evenly with minimal splatter.

SAINT-GOBAIN

BEAR-TEX[®]WHITE SCREEN DRIVER
STAIN APPLICATION PAD

Typical Process

- Edges are cut in and wiped off by hand in appropriate size section of floor
- Stain is applied to main section of floor with buffer
- A clean screen driver pad is put on the buffer to buff off excess stain left on floor
- Move to next section of floor

Buffing on Stain

Buffing on stain is a technique that is gaining in popularity due to the time savings over traditional methods and the use of fewer materials, like rags and stain.

Our screen driver pads in tandem with our maroon conditioning pads create the perfect system for applying stain with a rotary buffer. The unique design of the screen driver pad allows it to hold and apply stain evenly on the floor without slinging.

The maroon pad (with 7" center removed) is placed on top of the screen driver pad. This center hole creates a "trough" where the stain is poured. This system is then driven with either a screen driver or maroon pad on the buffer drive plate. The screen driver and maroon pad remain on the floor during the process. The operator only needs to tip back the buffer to add more stain to the "trough". This makes for less mess during the process.

PART #	GRIT	PKG / CASE
16" x 1/4" Diameter		
662610 16968	White	10 / 10
17" x 1/4" Diameter		
662610 17116	White	10 / 10
20" x 1/4" Diameter		
662610 17118	White	10 / 10

NOTE:

- Not all stain can be applied with this method, check with stain manufacturer
- Do not work too large of an area to avoid lap marks
- Dispose of used pads properly, they are flammable
