THE NORTON BRAND

Norton, the world's leading abrasive brand, is a key ingredient in an effective portfolio of brands from Saint-Gobain Abrasives. For over 125 years, Norton has provided innovative abrasive solutions for the challenges faced by many markets. Our dedication to our business and our customers ensures we are the world's number one abrasive manufacturer, supplying a complete range of products that add value and efficiency for our customers.

TECHNOLOGICALLY ADVANCED

Norton uses precision, cutting edge technology to produce highly engineered solutions.

INNOVATION

Revolutionary ideas applied to new products.

LEADERSHIP

Norton leads in terms of sales, innovation and technical knowledge.

PREMIUM

Recognised across the globe as the world's premium abrasive brand.

SAINT-GOBAIN ABRASIVES: A WORLD CLASS MANUFACTURER

With operations in 64 countries, employing almost 190,000 people, Saint-Gobain is one of the world's top 100 leading industrial corporations. Saint-Gobain Abrasives has a presence on every continent, with operations in 26 countries, employing c.10,700 people; and is the only international manufacturer of the 5 main types of abrasives: Bonded, Coated, Diamond Blades, Cutting-off and Grinding Wheels and Super Abrasives.

Through the World Class Manufacturing programme, Saint-Gobain Abrasives has been able to reduce loss and waste, improve operational efficiency and product quality and ensure excellence in production capabilities. All operational and support functions; manufacturing, purchasing, product development and business processes are involved, with the aim to achieve world class manufacturer status in all our factories.

BUILDING OUR ENVIRONMENT TOGETHER

As the world leader in designing, manufacturing and distributing Habitat and construction materials, Saint-Gobain is committed to meeting some of the fundamental challenges faced by the world today: reducing energy consumption, limiting our impact on the environment, and creating a new generation of buildings which are safe, comfortable and energy efficient.

Today we are leaders in all our industry sectors, providing proven, easy-to-use systems aligned to local needs, practices and legislative requirements in every part of the Habitat and construction markets, from homes to public buildings and offices, and from new-builds to renovation projects.

Abrasives combine with the other Saint-Gobain businesses to offer a complete solution for those who work within Habitat markets:

PLUMBING

BUILDING

PAINTING & DECORATING

CARPENTRY

TILING

Our state-of-the-art product testing facilities or 'Centres of Excellence' are paramount to continuing our commitment to delivering technological excellence. Located in our manufacturing plants across the globe, each centre concentrates on the development of exciting new products for all abrasive applications and contributes to the product knowledge of our sales teams and customers.

ENVIRONMENTAL IMPACT

Saint-Gobain has strong environmental management systems in place, from initial product development stages, to the end of the product life cycle, through reduced

consumption of raw materials and management of natural resources, to waste management and recycling, helping us to reduce energy consumption and our environmental footprint.

Raw Materials – utilising responsibly sourced material and preserving natural resources is a high priority so our Coated Abrasive plants manufacturing paper backed products are now FSC certified.

Manufacturing – all Saint-Gobain Abrasive manufacturing plants implement an Environmental Management System and are certified with the ISO 14001 standard. Eighty percent of manufacturing sites in the Saint-Gobain group are now ISO 14001 accredited, with a particular focus on reducing carbon dioxide (CO₂) emissions.

Product impact during use – through R&D we look to develop solutions for our coated, diamond blades and cutting-off and grinding wheels in providing less dust, noise and vibration during use and aim to create products that last longer and work faster.

Waste management and recycling – new production processes are regularly implemented to help minimise waste created through all manufacturing procedures.

OUR INTERNATIONAL COMMITMENTS

By joining the United Nations Global Compact in 2003, Saint-Gobain Group confirmed our commitment to sustainable development in line with its Principles of Conduct and Action. In January 2009, the Group took its commitment to the UN Global Compact one step further by endorsing the Caring for Climate statement and the CEO Water Mandate for Water Resource Protection as part of the UN's Millennium Development Goals.

HEALTH & SAFETY

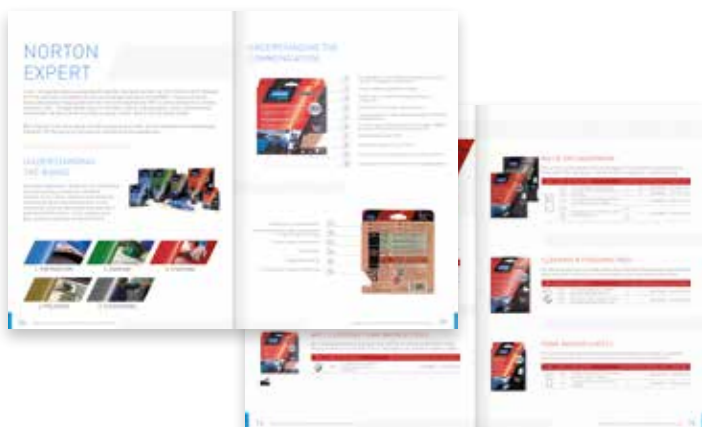

Commitment to health and safety is paramount and is reflected in the Habitat initiative through all aspects of the business.

Saint-Gobain promotes a culture across all its functions where safety is of the highest value and priority, with an objective of zero work related accidents.

Our abrasives are designed and produced to the most stringent quality standards to guarantee optimum personal safety and user comfort. Saint-Gobain Abrasives is a founder member of FEPA, the Federation of European Producers of Abrasives, dedicated to the promotion of safety in the use of abrasives and is actively involved in the preparation and implementation of the European (EN) and International Standards (ISO) for Abrasives and Grinding Machines.

Norton Expert products comply with all expectations of European health and safety standards. oSa, the Organization for Safety of Abrasives pursues in close collaboration with FEPA, the objectives of supporting both the currently attained safety standards for abrasive products and their further developments.

HOW TO USE THIS BROCHURE

This brochure has been designed to make product ordering as easy as possible. Products have been divided into sections by sanding stage and each section includes information on the product availability and ordering information.

HOW TO ORDER

When placing an order it helps to have the following information available:

- YOUR NAME
- YOUR ACCOUNT NUMBER
- YOUR ORDER OR REFERENCE NUMBER
- PRODUCT ARTICLE NUMBER (S)
- REQUIRED QUANTITY
- ANY SPECIAL INSTRUCTIONS

If you require additional product or technical information then please do not hesitate to contact your local Customer Service Centre or Sales Representative.

Alternatively use Abrasive Connection, our e-commerce solution. Abrasive connection is a secured B2B online ordering system that runs 24 hours a day, 7 days a week. It offers product search, online order-entry and order-tracking. Please contact your sales representative for more information.

In addition, the Saint-Gobain EDI (Electronic Data Interchange) system directly connects our supply chain software with our customers' order management system. With EDI, customers' purchase orders are registered and acknowledged automatically. Launching the manufacture and shipping of goods.

DISTRIBUTION CENTRES

With two main logistics platforms and several local distribution centres all over Europe, our logistics professionals ensure that Norton Expert products reach you on time. Quick and special delivery services can be arranged upon request to best suit end-user requirements (conditions apply).

NORTON EXPERT

A new, cutting edge abrasive and polishing range for hand and machine use, from Norton Expert designed for minor spot repair and defect removal on car panels, bumpers and headlights. The process driven, trade quality product range guides both the novice and experienced DIYer or semi-professional to achieve a flawless finish. Through simple, easy to understand, step-by-step packaging communication we will help to better educate end users to improve quality of finish, ease of use and speed of task.

With impactful, informative design and with innovation at its heart, the Norton Expert Auto range provides a dynamic DIY offering, focusing customer attention and stimulating action.

UNDERSTANDING THE RANGE

Defined by application, products are categorised by sanding stage, providing a complete solution, from coarse, aggressive products for panel preparation and sanding filler, to fine smoothing, finishing and polishing products to achieve a perfect shine. Using a sequence of grits is key to achieving the perfect finish:

1. PREPARATION

2. SANDING

3. FINISHING

4. POLISHING

5. ACCESSORIES

UNDERSTANDING THE COMMUNICATION

Strong Norton Saint-Gobain branding gives a clear 'quality' message to the end user

Colour coding by application stage

Expert logo for professional quality brand recognition

Prominent grit number and description

Supporting text to communicate product information and application

Process stage communication, encourages multiple purchase and maximises basket quantity

Window exposing product

Machine product is to be used on

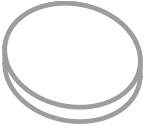

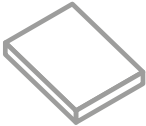

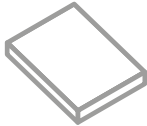

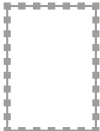

Product size, hole configuration and pack quantity

Car image to communicate automotive applications

- Explanation of range benefits
- Table communicates application details for each stage of sanding
- Further product information
- Sanding tips
- Trade quality stamp
- Article number used for reordering

MERCHANDISING SOLUTIONS

Effective merchandising is a powerful tool not only in increasing sales and profitability but also in building credibility with end users.

Take advantage of the professional planogram service offered by Saint-Gobain Abrasives and maximise the efficiency of your merchandising space.

Contact your sales representative today for more information.

POINT OF SALE SUPPORT

To support selling activity visual aids including headers, bus stops and an application guide are available, offering product and selection information in a professional, vibrant, educational format.

THE AIM:

- Demonstrate an integrated and complete product range
- Inform, educate and help end users select the right product for their task
- Save time – reduce time spent selecting the right product
- Encourage multiple and repeat purchase
- Better informed end users shop better, quicker, and increase abrasive category revenue.

MASKING TAPE

For general masking applications, conforms easily to contours and irregular shapes and can be used on all surface types. Resists temperatures up to 80°. Prevents seepage and leaves no residue upon removal.
