## THE MOST EFFECTIVE SOLUTION FOR PREPARING, MIXING & SPRAYING PAINTS

Providing a faster and cleaner solution, the Norton Paint System saves on cleaning time and solvent usage, allows paint to be stored and reused and enables the operator to paint in all positions, even upside down - without any risk of the paint leaking.

The easy to assemble system ensures a consistent spray pattern, convenient storage of paint as well as easy and clean disposal of the entire unit. A complete range of products & accessories are also available.

- 1 **FASTER**  
2 clip fixing system
- 2 **CLEANER**  
disposable spraying cup
- 3 **LIGHTER**  
reduces fatigue when spraying
- 4 **EASIER**  
comfort at every stage

## PREPARATION

- Each disposable kit comes complete with:
  - Lids with membrane
  - Rings
  - Mixing bar
- Re-usable hard cup and adapters ordered separately
- 3 sizes: 250 ml, 750 ml & 950 ml & 3 filters 80  $\mu$ , 125  $\mu$  (blue filter) & 190  $\mu$  to cover all applications
- Easy assembly.

### ADAPTER WITH ACTUATOR & MEMBRANE

The new actuator inside the adapter, has been specially designed to pierce the membrane inside the lid, allowing the paint to flow through when the cup is attached to the spray gun.

**TIP** The new improved Norton Paint System can only be used with the new adapter serie A.1

## HOW TO USE NORTON PAINT SYSTEM

### 1 PREPARE

- Fix the ring into the hard cup
- Position the liner into the ring.

### 2 MIX

- Pour the paint into the liner & mix the paint with the mixing bar
- Remove mixing bar  
Do not wipe excess paint off on the ring.

## MIXING

- Curved base of liner ensures all paint is mixed thoroughly
- Airtight system prevents paint from drying out
- Disposable unit, ensuring zero contamination & quick, easy clean up
- Norton Paint System can be shaken with no risk of spilling once the lid is attached, thanks to the new membrane positioned inside the lid.

### TIP

Withdraw the mixing bar vertically & wipe off the excess paint with a clean cloth. Avoid contact with the ring.

The Norton mixing bar has a specially designed curve which follows the contour of the liner, for an even paint mix

## SPRAYING

- Paint in all directions, even upside down, with no risk of leaking
- The liner contains a vacuum that will collapse as the paint is sprayed, this ensures all paint is used and distributed evenly
- When using the 250ml & 750ml systems, the hard cup can be removed, reducing fatigue
- Ultra-light adapters available for all paint guns

### TIPS

- Removing the hard cup gives better visibility, the gun is lighter & more comfortable to use.
- The 250ml paint cup is the ideal size for respraying a single body part, ideal as 70% of repairs only involve a single part. A cost saving solution.

## 3 ASSEMBLE

- Place the lid on top of the hard cup and turn it:
  1. twice to the left - listen for the **2 CLICKS**
  2. once to the right
- Fold down the 2 safety clips, the system is now sealed.

## 4 ATTACH

- Turn the cup upside down and mount onto the spray gun piercing the membrane with the actuator inside the adapter
- Snap adapter locks over adapter base.

# AFTERCARE & STORAGE

- The most effective and productive solution – faster & cleaner
- Saves on cleaning time and solvents, thanks to the disposable unit [15% more efficient]
- Paints can be stored and reused.

NORTON PAINT SYSTEM CAN BE STORED QUICKLY & EASILY IN MANY WAYS:

## REFILLS

Refill kits available to order  
(include lids & storage caps)

## TIP

Storing upside down in the Norton storage cup keeps the filter moist and prevents drying out so that it can be reused.

## 5 SPRAY

- For ease of use, when using the 250ml & 750ml kit you can remove the hard cup
- You are now ready to paint.

## 6 STORE

- Put the liner back into the hard cup and secure the clips
- Pull trigger to release any paint left inside the gun
- Unclip the gun from the cup & push storage cap on to seal.

## DISPOSABLE KIT includes Liners / Lids / Rings / Caps

Volume	Filter 80 µ	Filter 125 µ	Filter 190 µ	Pk Qty
250ml	-	63642504727	63642504734	48
