THE RANGE OF ABRASIVE Q275 FILM DISCS FOR ALL SANDING APPLICATIONS

The Norton Pro Film (Q275) disc range has been specially designed in line with the latest requirements in end user applications. With a No-Fil[®] stearate treatment on top of high performance aluminium oxide abrasive, the new range of film backed discs from Norton are not only tough and hard wearing, but also reduce clogging and dust build-up in all sanding applications. The super smooth flexible film backing provides a consistent scratch pattern, providing the perfect solution for a flawless finish.

WHY USE FILM DISCS?

The film backing provides a combination of tear resistance with the same great performance of Norton No-Fil[®] paper discs but with a smoother finish in all sanding applications, reducing the need for further sanding or leveling and preventing the need for rework. Film discs also provide a uniform scratch pattern, for polishing out quicker and reducing process time. Used dry, Norton Pro Film provides excellent versatility in all applications.

WITHOUT NO-FIL[®]
Immediate balling up of dust particles

WITH NO-FIL[®]
Dust particles remain separate

PRODUCT FEATURES

- Heat-treated aluminium oxide grain
- FEPA 'P' graded abrasive
- Waterbased No-Fil[®] stearate layer on the abrasive
- Flexible film backing
- Self-gripping backing
- Full range of grits available
- No colour contamination as no pigment inside

USER BENEFITS

- Fast cut, good material removal and excellent performance
- Approved, high quality discs
- Prevents dust build-up during sanding
- For dry sanding
- Provides a consistent scratch pattern, reduces rework
- Tear resistant
- Quick & easy disc changing, reduce process time
- A product for every application stage

MARKETS & APPLICATIONS

AUTOMOTIVE

- Sanding filler, primer and lacquers
- Finishing paints
- Blending & de-nibbing
- Eliminate pig-tails, defects & orange peel

MARINE

- Sanding & finishing gel-coat
- Sanding & finishing composites
- Sanding & removing resins

METAL WORKING

- Metal finishing
- Preparing primed & painted surfaces

AIRCRAFT MANUFACTURE & REPAIR

- Sanding & finishing paint

WIND TURBINES

- Sanding & finishing composites

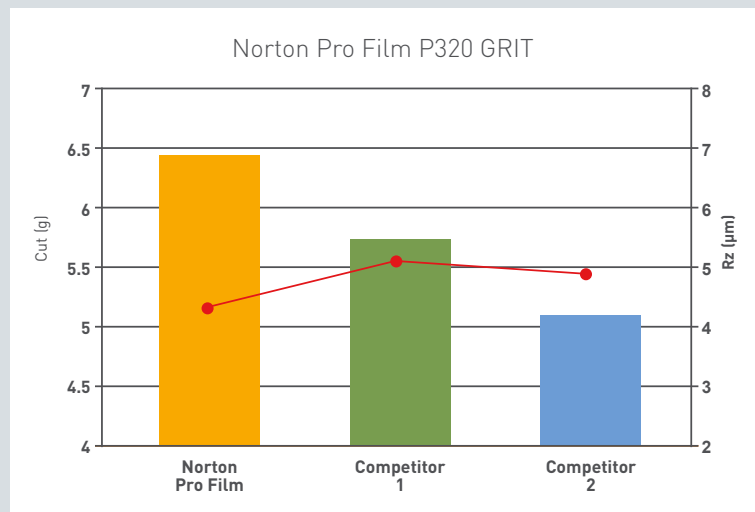

WOOD

- Sanding & finishing & varnished surfaces
- Furniture restoration

BENCHMARK INTERNAL TESTING

Using a P320 grit disc, controlled internal tests showed Norton Pro Film removes 20% more material than competitor film discs, provides a better finish and has a longer life.

= Material removal = Surface roughness

Norton provides a complete solution of abrasive discs for all sanding applications. Contact your local sales representative to find out what's on offer and how Norton can help you save time and money.

APPLICATION GUIDE

GRIT	APPLICATIONS	BACK-UP PAD	DA SANDER	RPM
P80	Leveling edges, sanding and finishing body filler.	HARD		
P120				
P150				
P180				
P220				
P240	Sanding and finishing on primer, before base coat.	HARD/MEDIUM	Orbit 5mm	
P320				
P400				
P500				
P600				
P800	Finishing and smoothing.	MEDIUM		
P1000				
P1200	Blending clear coat.	SOFT PAD OR MEDIUM PAD WITH INTERFACE	Orbit 2.5mm	
P1500				
	Removal of small defects.
