SAINT-GOBAIN

NORTON QUANTUM R928 – BELIEVE IN PINK!

R928 pink high performance flap discs, with polycotton cloth backing and ceramic grain, provide an improved cut rate and product life compared to both premium zirconium discs and ceramic products in the market, thanks to its high density configuration.

R928 also features an additional supersize layer giving this flap disc range cooler cutting properties, reducing heat generation during use for better part quality first and every time.

R928 is the ideal flap disc for quick grinding when used at medium pressure on stainless steel or harder metals.

FEATURES

- New ceramic grain formulation
- Polycotton cloth
- Heavy abrasive density vs standard ceramic product
- Supersize treatment
- Competitive pricing
- New PINK flaps

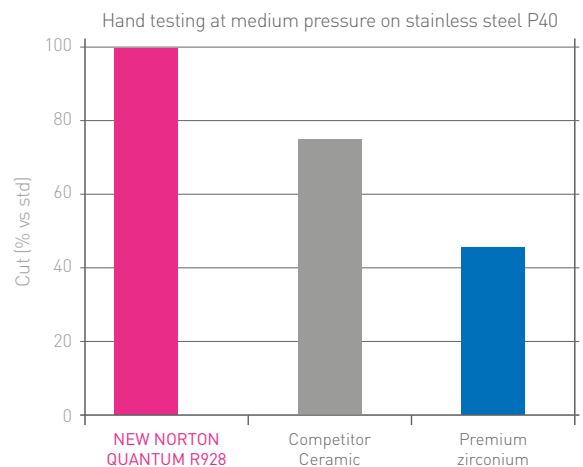

BENEFITS

- High and quick cut rate
- Heavy stock removal
- No Glazing
- Regeneration of grain optimised
- Good resistance
- Comfortable to use, less vibrations
- Thicker product
- Longer life time
- Boosts cut rate
- Cooling agent
- No burn marks
- Meets market need
- Differentiate vs competition
- Easy to identify on merchandising

WHY YOU SHOULD BELIEVE IN PINK

RESULTS

New NORTON QUANTUM R928 is cutting as +30% vs ceramic competitor and +50% vs Premium zirconium we find in the market. It provides extra lifetime and a brilliant finish.
