

THE MOST VALUABLE PRODUCTS IN THE FLOOR SANDING MARKET

The Norton Blaze family of products feature state-of-the-art ceramic grain that delivers an incredibly sharp cut unrivaled in the home, commercial or the sport floor market.

In the overall Norton performance product offering Blaze represents the best Norton has to offer. It is no different with the lineup of Blaze products we have put together for the Professional Hardwood Floor industry. We have assembled a comprehensive list of products to meet the most rigorous applications.

Whether you are sanding a large sport floor or removing factory applied UV finishes the Blaze products give you the speed and life to make the job quick and easy. Using our specially designed ceramic grains that we make in-house we are able to dial in the performance you are looking for and offer you a product that no other abrasives supplier can offer.

Our offering ranges from cloth belts and rolls in all sizes to edger discs of all varieties to hook and loop discs for both random orbital sanders or multi-head floor machines. We've got it all.

THE MUSCLE BEHIND THE MACHINE®

- Super-sharp premium ceramic grain cuts fast and delivers unparalleled longevity resulting in less belt changes
 and more footage per job. Leaves a fine scratch for easier sanding and a better overall finish.
- Heavy grain weight design offers extra long life and a multitude of cutting points to easily sand through multiple layers of tough coatings and UV-cured finishes.
- · Heavy-weight cotton backing is extremely strong and durable and has excellent tracking capabilities.

Norton Blaze *Plus* belts and rolls features state-of-the-art ceramic grain that delivers an incredibly sharp cut unrivaled in floor sanding market.

The heavy grain coating of the Blaze *Plus* offers exceptional product life. The high performance ceramic grain is designed with super sharp cutting action allowing it to easily penetrate the hardest of surfaces.

Designed specifically for the toughest sanding applications, Norton Blaze *Plus* tackles gym floor re-sands with ease and is proven to cut through UV-cured pre-finished floors in one pass.

PALLMANN

- Improved ceramic alumina micro-fracturing grain constantly exposes sharper grain edges to significantly increase cut rate and life.
- Heavier fiber backing for additional strength and tear resistance.
- Product design is ideal for applications where aggressive cut rate and product life is critical.
- · Ceramic grain offers super-fine scratch patterns.

Built For The Hardest Surfaces

Designed for the most rugged of floor sanding applications, BlazeX fiber discs offer superior cut rates and product life. The stiffer fiber back gives BlazeX an aggressive cut while the ceramic grain gives it a natural super-fine scratch pattern. Whether you are dealing with aluminum oxide coated pre-finished flooring or several layers of hard finish the Norton BlazeX fiber disc will offer the best cut rate and longevity of any product on the market.

- · Super tough backing
- · Premium blend of ceramic grain
- Ultra-fine scratch pattern

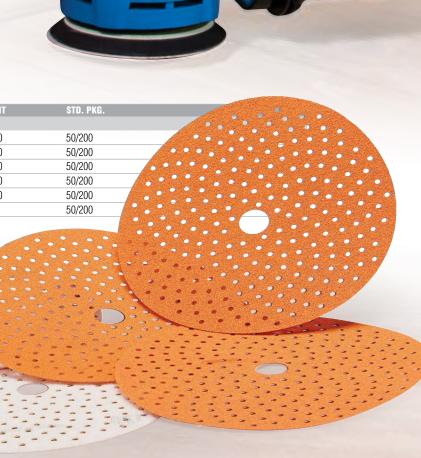

An all-new exclusive backing design provides extraordinary strength with tear resistance well beyond any flexible paper disc in the market, as much 2-3X. This super-tough, polyester-reinforced D-weight hook & loop backing means exceptional edge adhesion of the grain even in the most demanding floorsanding applications; so, grain shed is virtually non-existent and the result is outstanding durability.

- Super-sharp premium ceramic grain cuts fast and provides unparalleled longevity
- Optimized grain coating to achieve both faster cut and life while providing a super clean scratch pattern.
- Heavy weight fiber reinforced paper backing stands up to even the most difficult applications.
- The perfect complement to both the R975 Blaze and R980P Blaze Plus belts for a consistent scratch
 pattern in all aspects of the sanding process.

PALLMAN

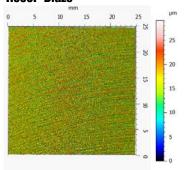

For the Toughest Applications

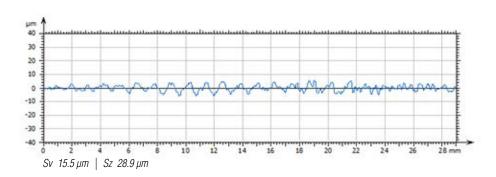

Our latest addition to the Blaze product offering is the complementary paper disc products to go with our cloth belts and rolls. Made using our standard heavy weight fiber reinforced paper, the Blaze H995P utilizes our highest performing ceramic grain to offer unprecedented product life and amazing cut rates all while providing the cleanest scratch pattern. The Blaze H995P is ideal for the most strenuous of applications including pre-finished hardwood floors and sports floors. Offered in just about every size in both bolt-on and hook & loop discs as well as rolls.

- Super-sharp premium ceramic grain cuts fast and provides unparalleled longevity
- Open coat grain design minimizes loading and provides an aggressive cut to easily sand through multiple layers of tough coatings and UV-cured finishes
- The most powerful abrasive in floor sanding
- Anti-static backing improves dust collection and keeps machines cleaner
- Tough poly-cotton backing is extremely strong and flexible

The Most Valuable Product in the Sport Floor Market

Norton Blaze Belts and Rolls feature state-of-the-art ceramic grain that delivers an incredibly sharp cut unrivaled in the sport floor market. The open coat grain design allows our premium abrasive to cut faster and more aggressively, giving it the unique ability to remove multiple layers of coatings quickly while minimizing loading. The anti-static poly-cotton backing is extremely durable and improves dust collection for a cleaner workspace for you and your customer.
