SAINT-GOBAIN®

AN UNBEATABLE TAG TEAM

ONE-TWO PUNCH IN METAL REMOVAL

Our BlazeX and BlueFire fiber discs team up to bring you a better, best one-two punch in metal removal. BlazeX F970 is our BEST tier choice for carbon steel and other soft-to-grind materials, while BlueFire F826P is our BETTER tier choice for these same materials.

We've added these BlazeX F970 and BlueFire F826P baling units to stock in popular diameters and grits to continue our growth in metal fabrication and welding applications. These BlazeX F970 and BlueFire F826P baling units are economically priced and packaged. A detaching pinch screw and plate allows for quick access to flat fiber discs for every use. Re-seat the plate and screw to keep the remaining discs compressed and flat for that next use or storage.

SAINT-GOBAIN

NOW IN STOCK

BLAZEX F970 Ceramic Alumina

- Improved ceramic alumina micro-fracturing grain constantly exposes sharper grain edges to significantly increase cut rate and life over competitive blended/low-ratio ceramic alumina discs
- Heavier fiber backing for additional strength and tear resistance
- Non-supersized design for cool cutting and long life on carbon steel and other soft-to-grind materials

BlueFire F826P Zirconia Alumina

- High-performance zirconia alumina abrasive blend provides 15% faster cut and longer life with less power draw than conventional zirconia discs
- Advanced resin bond technology with enhanced grain adhesion for extended life
- Heavier fiber backing for additional strength and tear resistance
