

EASY ON THE EARS AND THE WALLET

The new more cost competitive Silencio Charger cuts noise with a unique more economical sandwich core design. The more aggressive 12mm (.472") serrated shape segment expands the material cutting range.

A more economical silent core design, serrated segment shape, and longer life formula increase the material cutting range and blade life while reducing noise. Combining the more economical quiet sandwich core with an electric motor is a perfect solution when cutting in sound sensitive work areas.

REDUCES NOISE BY 8X

The Silencio Charger diamond blade reduces noise by -9 dB(A) compared to the conventional blade

FEATURES & BENEFITS

- Specially developed sandwich core design, reduces noise up to 15 dB(A) more than the traditional copper sandwich or laser cut core blades.
- Elimination of the whistle-effect with a blade guard during operation.
- A tall 12mm laser welded segment leads to longer blade life and faster cut.
- Serrated segment shape helps lower impact on materials improving quality of cut similar to a continuous rim blade. Smoother operating for less operator fatigue.
- New diamond and bond specification created for masonry applications, resulting in extremely fast cutting in a large variety of materials.

Sound Frequency Difference

103.2 dB(A)

The Silencio Charger blade ran at 12.5% noise when cutting washed concrete on a Norton Clipper BBM307 masonry saw with a 14" blade.

112.2 dB(A)

The standard blade ran at 100% noise when cutting washed concrete on a Norton Clipper BBM307 masonry saw with a 14" blade.

Silencio Charger Diamond Blade

UPC	PART #	SIZE	MAX RPM	SEGMENT HEIGHT
701846 03318	SILENCIO CHARGER	14 x .122 x 1	4365	12mm (.472")

* For use on masonry saws only.
