BLAZE^X

THE BLAZING GLORY OF PERFORMANCE

MEET THE NEXT GENERATION OF BLAZE

Get the right finish by enhancing your rust removal, cleaning and detailing processes with the next generation Blaze. The BlazeX F970 fiber and quick-change discs have been developed with carbon steel and other soft-to-grind materials in mind, to provide cool cuts and long life thanks to its non-supersized design. The improved Blaze micro-fracturing grain delivers better cut rate, and longer life when compared to blended ceramic alumina discs. A heavy fiber backing resists tears while providing better face to surface grinding.

KEY INDUSTRIES

MRO | METAL FABRICATION |
WELDING | OIL & GAS |
ENERGY | SHIP BUILDING

KEY APPLICATIONS

STOCK REMOVAL | DEBURRING |
BEVELING | BLENDING |
CLEANING & DETAIL | FINISHING

FEATURES & BENEFITS

- Improved ceramic alumina micro-fracturing grain constantly exposes sharper grain edges to significantly increase cut rate and life over competitive blended/low-ratio ceramic alumina discs
- Heavier fiber backing for additional strength and tear resistance
- Non-supersized design for carbon steel and other soft-to-grind materials
- Best choice for coarse grit fiber and quick-change disc beveling, blending, deburring, and stock removal applications as BlazeX F970 is over-graded

+ Non-stock. Ask your Norton representative for current order quantities, lead-times, and quotation.

TECH TIP

Use the new next generation Norton BlazeX F970 fiber and quick-change discs for carbon steel jobs, and Norton Blaze F980 fiber and quick-change discs are still your preferred choice on stainless steel applications.
