

MESH-POWER™

POWERFUL DUST EXTRACTION

FOR A BREATH OF FRESH AIR

Sanding often times can be dusty and messy. With Norton MeshPower sanding discs we have created a product that provides virtually dust free sanding; meaning a cleaner and healthier working environment, a better finish and a much more comfortable sanding experience. MeshPower discs are a multi-functional abrasive, designed with thousands of holes, created by the unique open mesh backing. This mesh structure allows for powerful and effective dust extraction in any application.

Patented Norton No-Fil technology works to prevent clogging for a better finish and longer life, saving operators time and money. It also allows the grain to wear evenly resulting in a finer scratch pattern, and faster, more consistent results throughout the product life.

GRIT GUIDE

80 COARSE	100, 120, 150 MEDIUM	180 FINE	220 VERY FINE	320 EXTRA FINE
For moderate removal and leveling surface imperfections	For light removal and smoothing of bare surfaces	For finish sanding and cleaning of bare surfaces	For very fine sanding of bare surfaces, primer and sealer sanding	For primer, sealer, and between coats sanding

NORTON MESHPOWER ADVANTAGE

- Mesh backing for optimum dust extraction
- Full ceramic grain for excellent cut rates and superior scratch pattern
- Norton No-Fil technology prevents clogging and creates a consistent cut throughout the product life
- Hook and loop design with no designated hole pattern is quick and easy to align to any backing pad – just apply and go!

COMPETITIVE BENCHMARKING

STOCK REMOVAL IN GRAMS*

**Results are based on 12 minutes of sanding on maple panel (80, 120, 220 grit).*

5", 6" & 9"

POWERFUL DUST EXTRACTION MEANS A CLEANER ENVIRONMENT

The demand for a cleaner working environment, better quality finish and reduced consumable cost, means sanding solutions have evolved, from paper backed abrasive to a mesh construction with thousands of tiny holes.

Norton MeshPower responds to these demands by offering dust extraction in many operations. The open mesh construction of the backing allows dust particles to flow freely through thousands of tiny holes, creating a virtually dust free sanding environment. Better for your health, better for your application and better for your business!
