

# COVER YOUR BASES WITH NORTON

Properly masking is one way to ensure a quality job, and keep your customers coming back. Norton Hand Masking Film is specially designed to resist paint flaking during multiple-coat paint applications. Paint overspray adheres to the outside layer of plastic, preventing flaking into the base coat and resulting in a cleaner overall work space. Offered in four different sizes with a .375 mil thickness, this clear film will allow you to achieve a high quality job in less time and protect from overspray.

## FEATURES & BENEFITS:

- Clear, Corona-treated film allows paint to stick to plastic, and prevents flaking
- Pre-folded sheets are simple to work and apply, making it quick and easy to mask a space in one pass without re-taping
- Strong cling keeps film in place, preventing contamination outside the work environment
- Roll offered on a standard core, making it suitable for use with most film dispensers on the market
- Versatile film is perfect for a variety of applications where proper masking is essential
