# PERFORMANCE GRINDING SOLUTIONS

**Norton School of Grinding offers a customized training program to meet your unique needs.**

## ON-SITE TRAINING AT YOUR LOCATION

**Get the most productivity out of your grinding process.**

Let us come to you. Our on-site training is a custom designed training program based on your needs, at your location. Whether you are looking to train new operators or provide a refresher for those experienced in the grinding process, our technical experts will provide classroom and/or hands-on training to help you get the most of your grinding processes.

## DURATION

1-2 Days Typical

## WHO SHOULD ATTEND

New or experienced operators and engineers. The curriculum can be tailored to meet the experience level of your employees.

## CLASS SIZE

Minimum of 5 attendees

## EXPENSES

**Norton | Saint-Gobain** will provide training and all course materials.

**Customer** is responsible for per person registration fee, access to an on-site training room for classroom style training, and materials and workspace for hands-on training.

## COURSES

**For our focused on-site training program, we offer training in the following markets:**

- Plywood & Particle
- Steel Conditioning (BZZ)
- Steel Roll Grinding
- Automotive (Cam/Crankshaft)
- Aerospace Creepfeed
- Cutting Tools (Round & Insert)
- Bearings
- Robotics Finishing

**The training can be offered in 3 ways**

- Beginner class (0-2 years grinding experience)
- Intermediate class (3-5 years grinding experience)
- Advanced class (5+ years grinding experience)

**Contact us today to schedule your session.**
