For applications in the manufacture, to repair, maintenance and renovation of composite, metal and wooden boats, Norton provides the most powerful, precise and user-friendly abrasive solutions. In grinding, shaping or finishing, when choice and value are required, we provide the widest portfolio of abrasives and system components together with expert knowledge from more than 135 years of experience.

Norton is a true full service value partner regardless of the application and our passion is delighting our customers, making them more profitable, everyday and helping to reshape the nautical industry, together.

CUTTING & GRINDING

For the manufacture of structural components including steel or aluminium frames, Norton offers precision cutting solutions in the form of diamond blades and cutting discs. Norton cutting discs can be used on metal, fibreglass and glass reinforced plastic.

PRODUCT HIGHLIGHT:
Norton Quantum3
See page 16-17.

MASKING & WIPING

For demarcation and protection applications in reconditioning and maintenance and repair jobs, masking tapes are essential. Norton offers a number of different tapes with unique properties that address many needs on all surfaces.

PRODUCT HIGHLIGHT:
Norton Premium Tape
See page 70.

SHAPING & DEBURRING

From grinding processes to shape metal to specific dimensions for hull frames and interior component parts, to bonding preparation in the renovation of an exterior surface, Norton offers a full solution of standard size and mini 'SpeedLok™' abrasives.

PRODUCT HIGHLIGHT:
Norton EasyTrim Flap discs
See page 27.

NORTON PAINT SYSTEM

An effective solution for preparing, mixing and spraying paint, offering a faster, cleaner solution, saving time and solvent usage. Unlike other systems, the Norton Paint System can be used without the hard cup for better visibility during spraying and a lightweight, more comfortable experience.

See page 79.

STRIPPING & CLEANING

From grinding metal to removing stubborn paint layers and anti-fouling, you need abrasives that can be relied on to work fast and last! The Norton range of non-woven discs offers a huge variety of solutions for scale and rust removal as well as blending applications to ensure the surface is fully prepared for the final process stages.

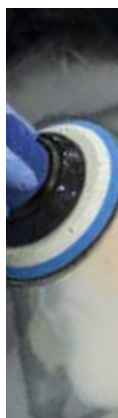

PRODUCT HIGHLIGHT:
Norton Blaze Rapid Strip See page 38.

POLISHING

After surface repairs, a high gloss finish can be achieved on gelcoat using Norton abrasives and compounds for the finishing and polishing stages. Whether working on a small or large area, Norton can be relied upon to provide the best solution.

PRODUCT HIGHLIGHT:
Norton Liquid Ice Xtra Cut
See page 85.

SANDING

Whether it's an interior or exterior surface that needs sanding, Norton has a solution. Breathe easy with MeshPower and Multi-Air, the ultimate dust extraction solutions that make light work of clean-up. New Norton A293 discs are designed specifically for sanding composite materials, making them ideal for use in marine repair.

PRODUCT HIGHLIGHT:
Norton A293
See page 55.

PERSONAL PROTECTION EQUIPMENT

Norton offers respiratory masks, gloves, glasses and overalls for protection and spraying in the boat yard or workshop.

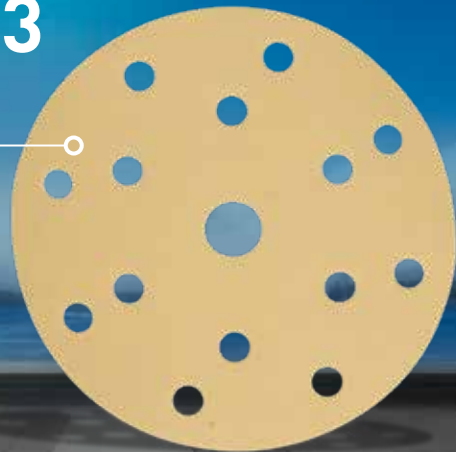

See page 90.

LATEST PRODUCTS

NEW NORTON A293 SANDING DISCS

Developed especially for use on composite materials, the new A293 discs are made from premium aluminium oxide grain for fast material removal when sanding. The strong paper backing and No-Fil® coating combine for clog-resistance and long disc life.

NORTON
SAINT-GOBAIN

MESH-POWER

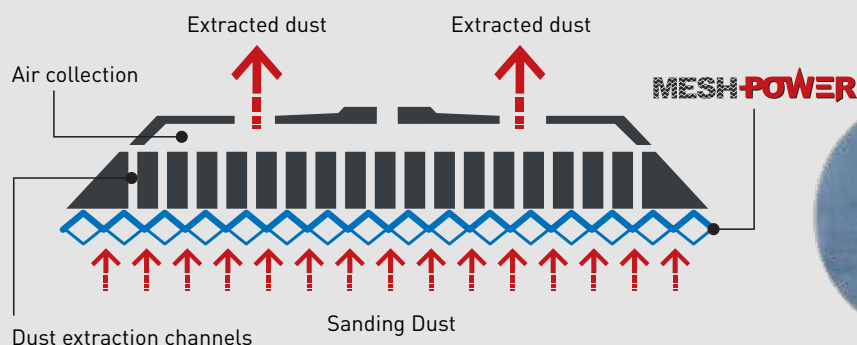

**CERAMIC
ADVANTAGE**

WHY CHOOSE A CERAMIC ABRASIVE?

Ceramic grain provides the ultimate material removal, best productivity, longest life and finest finish.

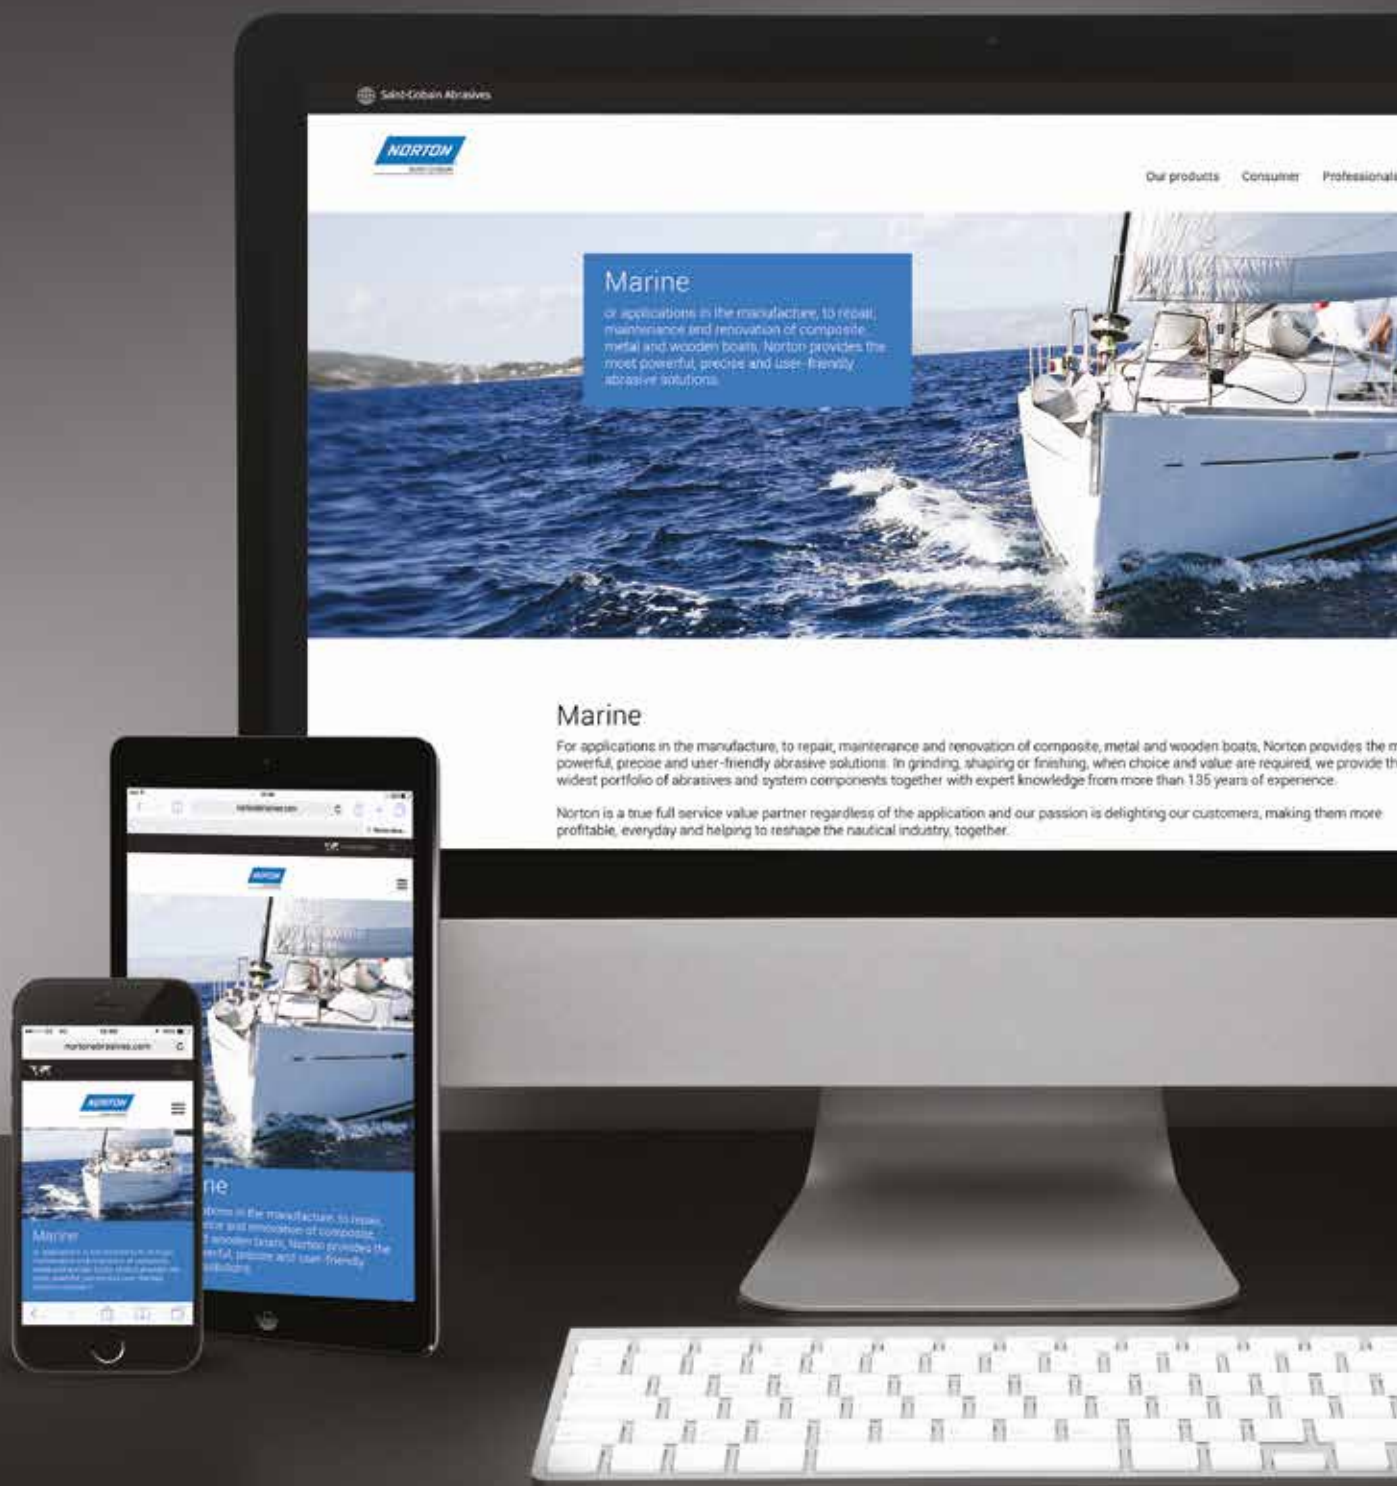

POWERFUL DUST EXTRACTION MEANS A CLEANER ENVIRONMENT

The open mesh construction of the backing allows dust particles to flow freely through thousands of tiny holes, creating a virtually dust free sanding environment. Better for your health, better for your application and better for your business!

NORTON

SAINT-GOBAIN®

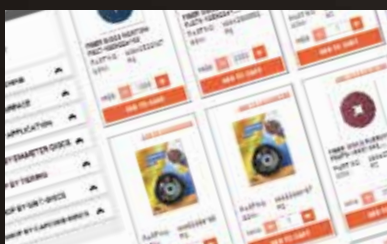

WE'RE MAKING IT EVEN EASIER TO ORDER OUR GREAT PRODUCTS

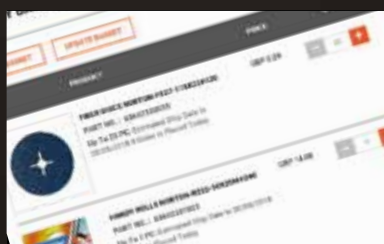

Introducing the **NEW** online ordering system from Saint-Gobain Abrasives - **MyAbrasives**

Our new user-friendly ordering system works very much like online retailers you use every day, making it much easier to navigate and get what you need, whether it's ordering, tracking or research.

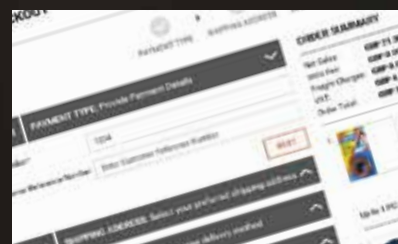

With MyAbrasives, the ordering process is now so simple:

Search for your product

Add to basket

Go to checkout

THE NEW SYSTEM MAKES ORDERING EASIER:

1. Detailed product information and specifications, including images and videos
2. Access to order confirmations, product availability and delivery lead times
3. Available from smartphones, tablets and PCs 24/7
4. Automatically creates a list of most frequently ordered products for ease of future ordering
5. Save favourite lists to make ordering quicker and easier

MYABRASIVES OFFERS GREATER FLEXIBILITY WITH NEW FEATURES AND SERVICES INCLUDING:

- **Product search:** you can now search by UPC, name, category, EAN number and filter and sort search results, making it much easier for you to find what you need
- **Order history and reordering:** you'll be able to see your past orders across all platforms (EDI, ABx, phone and fax) and these can also be easily re-ordered. Invoices, debit/credit notes and shipping status will also be visible in the 'Order History' section so you can be sure all of your paperwork is safe in one place
- **Quotes:** you can now request and track quotes in MyAbrasives rather than having to contact the customer services team separately
- **Saved orders:** you can save orders for future reference by putting multiple items in your cart and saving it, e.g. as 'Monthly Order'. You can also add a note to indicate the order frequency, e.g. 'order every month except December' and save it so you can re-order quickly and easily
- **Bulk orders:** if you need to make a bulk order, you can upload a CSV file directly into the system rather than having to search for each product individually
- **Recommended for you:** a new feature showing related products you may need to order
- **Extra support:** navigate the new system with FAQs and how-to videos or contact our dedicated helpline

EXCELLENCE TRAINING CENTRES

It is our goal to establish a long-term relationship with our customers, with a strong emphasis on sharing our professional skills, process knowledge and providing up-to-date information regarding industry developments.

Our Excellence Training Centres in France, Italy, Germany and Poland, are fully equipped facilities offering professional technical locations for hands-on training based on best practices in boat yards.

Our training sessions are held on a regular basis and are open to everyone! If you are interested in participating, please contact your local Norton representative to arrange a suitable date.

Our mobile demonstration centre allows us to meet you anywhere, for a demonstration by our technicians. This provides the opportunity to “put to the test” our Norton AdVANtage program, demonstrating the benefits of Norton’s innovative products in your own working environment.

Advantage

THE NORTON ADVANTAGE:
WE CAN VISIT YOU ANY TIME,
ANY PLACE, ANYWHERE.

CUTTING TO BLENDING

FOR METAL AND COMPOSITE STRUCTURES

STEP

1

CUTTING

NORTON QUANTUM3

When speed is key, reach for none other than Norton Quantum3, thanks to its ceramic grain, it cuts through metal, aluminium and stainless steel with ease and precision.

STEP

2

DEBURRING & SHAPING

NORTON R928 FLAP DISC

A high performance flap disc for use with medium to high pressure on metal, stainless steel and gelcoat.

STEP

3

BLENDING & REFINING

VORTEX RAPID PREP (SCM) DISC

Vortex grain technology combines the cutting speed of coarse grits with the finish of fine grits. A durable product for blending, finishing, cleaning, and light deburring

PROCESS CHARTS

GELCOAT FINISHING

STEP 1	SURFACE PREPARATION DISCS: NORTON A293 & MESHPOWER For use on primer, filler, paint, lacquer, fibreglass, aluminium, gelcoat and plastic for hull, crack and spot repair	
STEP 2	MASKING MASKING TAPE For masking internal or external boat surfaces, Norton offers a range of solutions. For general areas use Gold or Premium Tape, easily removed without leaving residue.	
STEP 3	PAINTING NORTON PAINT SYSTEM The most effective system for preparing, mixing and spraying paints which provides a fast, clean solution allowing paint to be stored and reused.	
STEP 4	GELCOAT FINISHING NORTON ICE XTRA CUT POLISHING COMPOUND Removes scratches in one step after sanding with P2000 grade discs. Provides a high gloss finish on top and clear coat surfaces.

SAINT-GOBAIN

CUTTING & GRINDING

Diamond blades can be used to cut glass reinforced plastic (GRP), carbon fibre, plastic composites, laminate and fibreglass in the manufacture and repair of cracks and damage in hulls, bulkheads, decks, cabin curves, cores and liners. They cut fast and with precision, making light work of any application when used on an angle grinder. Use grinding wheels in structural repair to grind and bevel cracks to cut back to the undamaged material before filling or bonding with resin.

DIAMOND BLADES

Cutting fibreglass and composite materials to size is necessary in both the manufacture and repair of all types of boats. Whether cutting large panels, or replacing an existing area, Norton offers diamond blades designed to provide a clean, precise cut.

NORTON CLIPPER PRO MARMO

- An electroplated blade which is thin for an ultra precise, smooth cut
- Dropdown diamond inserts on the steel centre clean the cutting profile to ensure a good quality cut

CUTTING & GRINDING ANGLE GRINDERS

CUTTING DISCS

Norton cutting discs are made for use on metal, steel and stainless steel for hull structures, interior and exterior components including hand rails, cleats, frames, ladders, platforms, propeller shafts, and rusted bolts where they provide long life and a smooth cut.

NORTON QUANTUM3

- When speed is key, reach for none other than Norton Quantum3, thanks to its ceramic grain, it cuts through metal, aluminium and stainless steel with ease and precision
- The ceramic grain also guarantees a smooth cut throughout the life of the disc making for a more comfortable cutting experience
- Reduce downtime and waste thanks to longer disc life

GRINDING WHEELS

Before and after metal parts are welded together in the manufacture of boat structures, they need to be prepared. Pre-welding preparation calls for bevelling of the surface, post welding, removal and flattening of the joining weld seam. Norton grinding discs can also be used for smaller operations including deburring after cutting and rough cleaning.

NORTON QUANTUM3

- Self sharpening ceramic grain removes material fast so grinding time is hugely reduced versus standard wheels
- Thanks to the sharp grain, vibrations through the machine are reduced for a more comfortable grinding experience
- The ultimate wheel life means less downtime and fewer wheels are needed, reducing total abrasive cost

MINI ANGLE GRINDER

When small areas require rework, a large disc and machine is not necessary. Using a smaller cutting or grinding disc on a mini grinder can be a great way to quickly repair cracks, blisters and crazing.

NORTON BLUEFIRE

- High performance grain for long life and reduced vibration
- Minimizes blueing, burrs and the need for rework
- Small diameter discs for small and intricate cutting jobs

CUTTING & GRINDING STRAIGHT GRINDERS

CARBIDE BURRS

Carbide burrs can be used to grind metal from small or intricate areas as their unique shapes can access even the most awkward applications. This comprehensive range of ALU carbide burrs, especially developed for high stock removal on aluminium, covers a variety of cutting shapes providing optimum results in preparing and removing welds, chamfering and deburring of aluminium frames for the marine market.

FOR CAST IRON & SOFT STEELS

ALU COATED

- 'ALU' cut style, coated with TiLAN (titanium aluminium nitride) for better sliding characteristics
- Reduced heat generation on the workpiece
- Excellent chip removal and reduced wear of teeth
- Reduces cutting pressure required due to improved lubrication

ALU

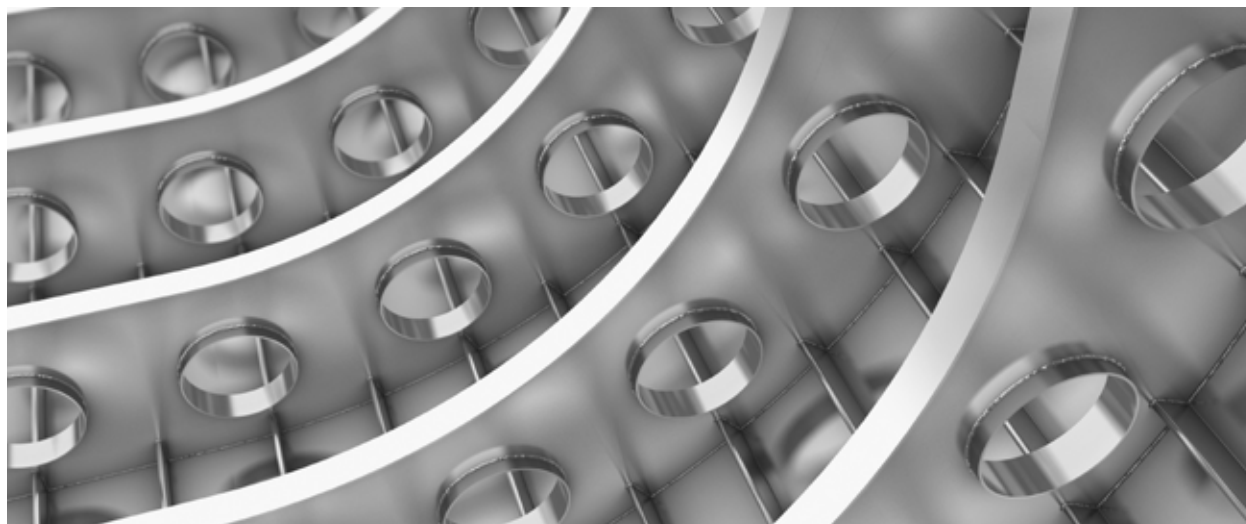

- 'ALU' cut style, for de-burring aluminium alloys and plastic
- A number of sizes available for a variety of applications
- Wide tooth formation for easy chip flow

SAINT-GOBAIN

SURFACE
PREPARATION

SHAPING & DEBURRING

After initial cutting and grinding, the frame or component parts need to be shaped to specific dimensions, or levelled in preparation for the next stage. During general repairs where steel or aluminium needs to be welded, Norton offers a choice of products to bevel and prepare joining edges, or flatten and blend weld seams ready for the next stage. Often, during renovation, the composite area to be bonded must be prepared before applying fibreglass (in core repair for instance) and Norton offers a number of abrasives to accommodate all steps of this process.

SHAPING & DEBURRING ANGLE GRINDERS

SURFACE
PREPARATION

FIBRE & SEMI FLEXIBLE DISCS

Choose a fibre or semi-flexible disc for the removal of burrs and edges left from cutting metal or fibreglass. The strong backing makes fibre discs tough and resistant to breaking. For more aggressive applications including stripping paint or scale build up from boats, use a flap disc as the multiple layers of abrasive and convex shape makes light work of contoured surfaces. Always use fibre and semi-flexible discs with a suitable backup pad.

NORTON QUANTUM F996

- Ideal for use in the repair of fibreglass, stainless steel and composites
- Use for deburring the casting mould edges of metal boat parts
- High performance ceramic grain works well in tough, heavy duty applications with high material removal and long life

FLAP DISCS

Flap discs are effective for lapping, cropping and trimming of hulls and grinding and removing weld seams. They cut faster and provide a better finish than fibre discs while having the added benefit of longer life thanks to the flap construction. They're durable and can be used not only on metal but also on fibreglass and composite materials.

NORTON QUANTUM R928

MAXIMUM PERFORMANCE

- A high performance flap disc for use with medium to high pressure on metal, stainless steel and gelcoat
- Ceramic grain on a polycotton backing ensures cut rate and life is maintained
- A versatile disc for structural repair applications on fibreglass and metal
- Use to remove gelcoat, repair gouges or grind edges of newly formed pieces

Also available in P80 and P120 on request.

NEW NORTON EASYTRIM R842

- A new concept in flap discs, EasyTrim can carry on grinding long after the product's life is over
- Trim down to the red line on the label and a 125mm disc becomes 115mm, exposing new grain on the inside of the flaps
- The projecting flaps are then ideal for grinding in curved, hard to reach areas of the hull, propeller or hatch cover
- Use fewer discs and save time and money
- With the colour coded back plate, choosing the right disc is quick and easy for each application

FLAP WHEELS

A great alternative to flap and fibre discs thanks to flexibility of the flaps, particularly on curved applications like paint removal on hulls. The life of a flap wheel is also longer, allowing more grinding time from one product.

NORTON QUANTUM R928

HIGH PERFORMANCE **+++++** 

- Excellent results on contours and uneven surfaces thanks to a uniform cut rate and consistent finish
- No dressing or preparation is required, the flap wheels are ideal for repairing gouges in metal, preparing and removing welds
- Ceramic aluminium oxide grain ensures long life in even the toughest applications on hard materials

SPEEDLOK DISCS

For applications on small areas, SpeedLok™ discs can access areas other larger discs can't. They're just as effective, but have the added benefit of working quickly and efficiently in tight spaces. Quick fix attachment system 'SpeedLok' does exactly as suggested, locks onto the machine with one twist, reducing wasted downtime.

NORTON BLAZE R980 P

- Small diameter discs perfect for grinding off hardened gelcoat in stress crack repair applications
- Aggressive surface removal over smaller and intricate areas
- Can also be used on steel, stainless steel, inconels and titanium with great durability and life

SPIRABANDS

Spirabands are abrasive rings made from reinforced cotton cloth backing and zirconium abrasive. They're ideal for small jobs on curved parts like portholes and small profiles where precision is needed.

NORZON R822

- Ideal for use on composites, fibreglass, plastic, wood and steel to shape or grind the surface
- Sharp zirconia grain cuts fast and is self-sharpening so the spiraband can be used for longer before dulling
- Reinforced cotton backing is heavy for improved wear resistance and excellent durability

SHAPING & DEBURRING FILE BELT MACHINES

FILE BELTS

Thanks to their long, narrow shape, file belts lend themselves well to grinding, shaping and removing burrs in small or hard to reach areas. Depending on the grit used (coarse to fine), they can also be used for blending to prepare for the finishing stage.

NORZON R822

- Ideal for material removal, roughing and finishing applications in hard to access areas
- Norzon grain continually exposes new cutting surfaces for long belt life even at high pressure
- Extremely durable for use on wood, metal, steel, plastics, composites and fibreglass
- X-weight cotton backing for moderate to light pressure applications

STRIPPING & CLEANING ANGLE GRINDERS

NON-WOVEN DISCS

Make light work of removing rust and scale from metal propellers, rudders, anchors or railings, or removing layers of old paint, varnish, wax or lacquer from internal or external wooden or composite parts with Norton non-woven discs. Not only do they work fast, the amount of material removed is easily controlled by the pressure applied during the application as they're stiff enough to withstand aggressive use, but soft enough to prevent gouging or rework.

BLAZE RAPID STRIP DPC TYPE 27

- The best choice for cleaning and removing rust, residue, corrosion, coatings, paint, light weld splatter and surface contaminants in hull or external component repair
- Can be used on metal, wood, fibreglass, and composites to leave the surface thoroughly clean and well prepared for the next stage of the process
- When used with pressure, Blaze will strip the surface and when used with lighter pressure will finish like a surface finishing disc, without gouging the surface
- Self sharpening grain made from micro crystals means Blaze has twice the life versus other ceramic disc, staying sharper for longer

STRIPPING & CLEANING MINI GRINDERS

NON-WOVEN DISCS

Get all the benefits of larger non-woven discs with the added advantage of accessing small and hard to reach areas. SpeedLok™ discs for mini-grinders make light work of removing rust and scale from awkward steel or stainless steel components like railings, handles and cleats. They're also ideal for removing layers of old paint and gelcoat in crack or bubble repair. Not only do they work fast, the amount of material removed is easily controlled by the pressure applied during the application as they're stiff enough to withstand aggressive use, but soft enough to prevent gouging or rework.

BLAZE RAPID STRIP

- The best choice for use in small and awkward areas for cleaning and removing rust, residue, corrosion, coatings, paint, light weld splatter and surface contaminants in boat repair
- Can be used on metal, wood, fibreglass, and composites to leave the surface thoroughly clean and well prepared for the next stage of the process
- When used with pressure, Blaze will strip the surface and when used with lighter pressure will finish like a surface finishing disc, without gouging the surface
- Self sharpening grain made from micro crystals means Blaze has twice the life versus other ceramic disc, staying sharper for longer

STRIPPING & CLEANING DIE GRINDERS

SURFACE
PREPARATION

BLAZE RAPID STRIP

- The best choice for use in awkward areas for cleaning and removing rust, residue, corrosion, coatings, paint, light weld splatter and surface contaminants in boat repair
- Can be used on metal, wood, fibreglass, and composites to leave the surface thoroughly clean and well prepared for the next stage of the process, Ceramic aluminium oxide grain ensures excellent durability and long life
- When used with pressure, Blaze will strip the surface and when used with lighter pressure will finish like a surface finishing disc, without gouging the surface
- Self sharpening grain made from micro crystals means Blaze has twice the life versus other ceramic disc, staying sharper for longer

RAPID STRIP

- A general purpose disc for removing coatings and light contaminants from many materials
- Leaves the surface well prepared for the next stage of the process
- Will not load on sticky coatings like adhesives and soft metals, or snag or shed while in use
- Nylon fibres, flexible resin technology and extra coarse grain for aggressive cutting and long life

VORTEX RAPID BLEND UNITISED WHEEL

- Can be used for a number of applications including removing light weld beads and splatter
- Proprietary engineered Vortex aluminium oxide aggregate grain produces a great finish first time, reducing cycle times, and overall abrasive cost
- Reduces heat build-up on the workpiece which helps the disc last up to 2x longer without shredding
- Special resin chemistry ensures the disc will not shed or smear

STRIPPING & CLEANING MANUAL USE

SURFACE
PREPARATION

NORTON R222 HANDY ROLL

- Thin strips of aluminium oxide abrasive with cloth backing designed for removing rust, scale, corrosion and paint from wood and metal
- The abrasive cuts through the surface with ease
- The cloth backing provides excellent flexibility for consistent sanding on tubes, curves and spindle shaped components where conformity to the surface is important
- Handy dispenser unit for easy storage and product accessibility in everyday use

SANDING

SANDING

Whether preparing surfaces for bonding in the repair of core related damage, sanding gelcoat and laminate, smoothing filler or resin, or preparing barrier coats ahead of paint or varnish applications, Norton offers a wide variety of sanding discs, sheets and rolls for use on Dual Action (DA) sanders, machines or hand blocks. New Norton A293 discs have been developed specially for use on composite materials and achieve a great performance versus cost ratio.

MACHINE SANDING

DISCS

Abrasive discs are used widely for applications from stripping to finishing, depending on the grit and abrasive type. Use with a Dual Action (DA) sander to speed up the process on larger areas. The Norton range is wide, providing a solution for any application and offering many benefits including superior dust extraction and anti-clogging for an excellent finish.

HEAVY DUTY SANDING

MOUNTING

For best results use with the 150mm and 203mm hard density Norton back-up pad on an orbital machine. See page 57.

BLUE FIRE NORZON H835

- Sharp Norzon grains cut through hard coatings, old paint layers, filler and can smooth sharp edges with ease without clogging, ideal for anti-fouling stripping hulls
- High strength E-weight paper backing makes discs strong, tear resistant and significantly reduces common issues such as curling and edge chipping
- A full resin bond system ensures the grain stays intact for longer for maximum productivity for the life of the disc

USE A SELF-GRIP BACK-UP PAD FOR ANGLE GRINDERS
69957350743

SANDING

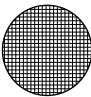

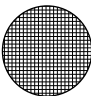

NORTON MESHPOWER M920

- Ceramic grain provides the highest cutting performance thanks to its microfracturing properties, meaning the abrasive stays sharper and lasts longer than equivalent aluminium oxide versions
- The ceramic grain, combined with the mesh backing structure means less pressure is required even on vertical panels, to remove material and less dust is generated for a more comfortable sanding experience
- For use on primer, filler, paint, lacquer, fibreglass, aluminium, gelcoat and plastic for hull, crack and spot repair
- No-fil® technology is applied to the abrasive grain for longer product life and a consistent cut
- Abrasive can be used wet or dry for the perfect results
- No defined hole pattern, saves time and effort aligning holes, just apply, and go

MOUNTING

For best results, use with the medium or hard Multi-Air back up pad, and for longer pad life, use with the pad saver. See page 57.

MULTI-AIR PLUS A975

- The hole configuration of Multi-Air discs provides substantially longer life thanks to excellent dust extraction which reduces clogging, cutting faster than discs with a conventional hole configuration
- SG Ceramic grain blended with heat treated aluminium oxide grains provides a high, fast cut rate on primer, paint, composites, gelcoat and non-ferrous metals
- The blend of grain provides a consistent and uniform scratch pattern, maintaining the desired surface finish and excellent wear resistance
- The unique hole configuration and No-Fit® coating resists clogging to extend disc life by up to two times more than conventional discs when sanding dry or wet. Disc colour will not transfer to the surface of the working area

FINISHING

MOUNTING

For best results, use with the Norton self grip Duo Foam interface. See page 58.

PURE ICE FILM DISCS Q175

- The ultra-thin film backing provides excellent flexibility which, when used with a foam interface, conforms very well to contours, helping the disc to sand evenly, even on the curves of a hull
- Patented resin technology promotes excellent grain adhesion that keeps the disc sharper for longer and imparts a consistent finish that's easier to buff out
- Water based No-Fil® stearate coating resists loading, eliminates pigtails and further extends the life of the product
- Colour coded grits provide an at-a-glance identification of the correct product across all hole configurations

DEFECT GUIDE COAT

- Quickly identifies pinholes and deep scratches in primer to ensure the total primed area is sanded prior to top coating
- Does not require masking and takes no time to dry
- Does not contain solvents and can be used for both wet and dry sanding

VOLUME	PK QTY	ITEM No.
100g	6	77696072696

CUT SHEETS

To ensure a flat finish when sanding large surfaces, a sanding block is a good tool to use. Norton offers a number of blocks in different dimensions as well as the abrasives to apply to them. With the Multi-Air hole configuration, dust is extracted from the surface to ensure a high quality finish.

MULTI-AIR NORZON H835

- Aggressive cutting performance for heavy applications including paint stripping and removal of filler when sanding and flattening sharp edges
- Leaves a consistent and uniform scratch pattern
- Heavy E weight paper backing adds resistance to help this range withstand tough applications on bare metal

NORTON MESHPOWER M920

- Ceramic grain provides the highest cutting performance thanks to its microfracturing properties, meaning the abrasive stays sharper and lasts longer than equivalent aluminium oxide versions
- For use on primer, filler, paint, lacquer, fibreglass, aluminium, gelcoat and plastic for hull, crack and spot repairs
- No-fil® technology is applied to the abrasive grain for longer product life and a consistent cut for the entire life of the product
- Abrasive can be used wet or dry for the perfect results
- No defined hole pattern, saves time and effort aligning holes, just apply, and go

MULTI-AIR PLUS A975

- The advanced No-Fil® coating both prevents build-up of dust and avoids premature clogging, in very fine grits it can be used for final dry sanding
- Patented Norton ceramic grain is blended with premium heat-treated aluminium oxide to deliver a very high cut rate that lasts up to twice as long as conventional abrasives and imparts a consistent, uniform scratch pattern
- A unique fibre-reinforced latex paper backing adds to the flexibility and makes the cut sheets tear resistant in all the applications
- Specifically designed for paint sanding from levelling filler to finishing primer
- With the self-grip backing, the Multi-Air Plus is easily affixed or removed from the sanding block as required

MULTI-AIR SANDING BLOCKS

- The perfect partner for Norton abrasives for high dust extraction, including Norton Cyclonic, Multi-Air or MeshPower, for cut sheets or rolls, available in a range of sizes for any product dimension
- An in-built air chamber keeps sanding dust-free and the workplace clean
- Robust, impact resistant plastic body that has been built to last and stand up to the rigours of day-to-day use
- Comfortable rubber grip helps the user maintain control over the process

DELTAS

Delta sanding sheets are a unique shape for accessing both flat areas and narrow angles and corners. Whether stripping, sanding or finishing Norton has an offer for all applications.

BLUE FIRE NORZON H835

- The sharp Norzon grains cut through hard coatings, old paint layers and dried filler
- Smooth sharp edges without clogging in stripping and anti-fouling applications
- High strength paper backing makes the sheets tear resistant and the self-grip backing is ideal for quick and easy changing on the machine

MANUAL SANDING

WATERPROOF SHEETS

All Norton's sandpaper sheets are designed to be used wet, which produces less dust and prevents clogging meaning longer life and a smoother surface compared with dry sanding. Use with a block for best results, see page 65.

BLACK ICE T417

- Premium silicon carbide grain delivers a fast initial cut and imparts a consistent finish across the surface
- The synthetic bond gives flexibility to the sandpaper, without cracking or curling, ideal when used on vehicle contours
- Use with a sanding block on flat surfaces or by hand, the extended grit range into higher grades is ideal for finer finishing applications
- Use wet for sanding polyurethane primer and cutting back an old surface before spraying, can also be used for cutting back flush joints

BEARTEX ROTOLO PRE-CUT ROLLS

- Thin web of nylon coated with abrasive grain which cuts well through any surface type including composites, wood, metal and fibreglass
- The open web construction prevents clogging from the abrasive dust and any excess dust can be rinsed as the product is washable
- The ultra flexible nature of the pads means they conform very well to contours and can be folded or rolled to access tight spaces
- Rolls are pre-cut so can easily be torn from the dispenser

BEARTEX NON-WOVEN PADS

Norton BearTex hand pads are a fantastic solution for conforming to contours thanks to the synthetic nylon. The nylon is impregnated with abrasive, which depending on the grade can be used for cutting through light paint layers to final cleaning.

NON-WOVEN APPLICATION GUIDE

- BearTex is made from silicon carbide and aluminium oxide grains bonded to synthetic resins to provide a cushioned, 3D material which is pliable, long lasting and provides an excellent finish without cutting through the undercoat/paint layer.
- The open mesh construction is both flexible and waterproof, meaning that it will not load, shapes itself to the contours of any surface and is washable and reusable.
- From cleaning to finishing, BearTex can be used in many body shop applications as it is available in pads, rolls, and discs in very fine to micro fine grades.

COLOUR	GRADE	GRIT GENERATED	FEATURES	APPLICATIONS
RED	Very fine	P320/400	Quick and aggressive cut. Tear-resistant.	Cutting back surface inside a brand new part.
GREY	Ultra fine	P600/800	Quick cut, uniform finish. Incredibly flexible, yet tear-resistant.	Finishing a primer on sharp edges. Gentle cutting back before flush joint. Can be used with Scuff Gel.
GOLD	Micro fine	P1000	Ideal for pearls and metallics.	Cleaning of clear coat or lacquer. Can be used with Scuff Gel.
WHITE	Non-abrasive	-	Use on all surfaces.	For final cleaning.

PRE-CUT HAND PADS BEARTEX

- Excellent flexibility, easy to tear, for use wet or dry.
- Combine the grey and gold pads with Norton Scuff Gel to clean, degrease and abrade in one step.

COLOUR	GRADE	GRIT GENERATED	152 x 229mm	PK QTY
Red	Very fine A	P320/P400	66261058000	60 (20x3)
Grey	Ultra fine S	P600/P800	66261058002	60 (20x3)
Gold	Micro fine A	P1000	66261058005	30 (10x3)
White	Non-abrasive	Non-abrasive	66261058001	60 (20x3)

THIN-FLEX HAND PADS BEARTEX

- Thinner than standard BearTex, when greater precision is needed.
- Flexible and durable, for use on contoured surfaces and hard to reach areas.

COLOUR	GRADE	APPLICATION	115 x 230mm	PK QTY
Red	Very fine A	For use before primer and on primer surfaces. Removes rust and cleans off metal.	63642506166	100 (25x4)
Grey	Ultra fine S	Ideal for blending applications. Final scuffing of primer. Flexible. Non loading.	63642506167	100 (25x4)
Gold	Micro fine A	Use for fine finishing and clear blend prep. Ideal for pearls and metallics	66261113519	100 (10x10)

SCUFF GEL

- Norton Scuff Gel is formulated to clean, degrease and abrade in one step.
- Designed for use with grey and gold BearTex pads, using Scuff Gel gives better paint adhesion.
- The water based formula rinses easily and leaves no mess.

APPLICATIONS	ART NO.	WEIGHT	PK QTY
Use with grey and gold BearTex	63642574653	700 grams	6 bottles

Rinses off easily and completely. Water-based formula, very low in V.O.C [Volatile Organic Compounds]

MASKING & WIPING

MASKING TAPES

GOLD TAPE

- Rice paper tape with a water based acrylic adhesive designed for fine line masking
- High adhesion on many substrates including paint, plastic, trims and rubber
- Flexible, waterproof and prevents paint bleeding

DIMENSIONS	PK QTY	ITEM No.
19mm x 50m	24	66261067434
25mm x 50m	36	66254490982*
38mm x 50m	12	66261067435
50mm x 50m	18	66254490986

*Made to order

PREMIUM MASKING TAPE

- For demanding applications, contours and irregular surfaces, does not bleed through, seep or leave residue when removed
- Excellent adhesion on all surface types thanks to the rubber solvent based adhesive
- Compatible with the most common paints and lacquers

DIMENSIONS	PK QTY	ITEM No.
19mm x 50m	48	69957394601
25mm x 50m	36	69957394602
30mm x 50m	32	66261193492
38mm x 50m	24	69957394603
50mm x 50m	24	69957394604

CHALLENGER TAPE

- Excellent resistance to paint, solvents, lacquer thinners, Challenger Tape shows outstanding tape to tape adhesion
- Saturated semi-crepe paper based masking tape is optimised for most surfaces and ideal for use on metal and plastic

DIMENSIONS	PK QTY	ITEM No.
18mm x 45m	48	66261133208
24mm x 45m	36	66261133211
36mm x 45m	24	66261133214
48mm x 45m	18	66261133216

FINE LINE TAPE

- Fine line tape is ideal for the demarcation of delicate paint work
- Conforms to the tightest contours without wrinkling
- Vinyl backing won't leave adhesive residue when the tape is removed
- Stretches to provide excellent flexibility

DIMENSIONS	PK QTY	ITEM No.
3mm x 55m	10	66261194993
6mm x 55m	10	66261194994
9mm x 55m	10	66261194995
12mm x 55m	10	66261194996
19mm x 55m	10	66261194997

POLYETHENE TAPE - 357

- Excellent adhesion to all surfaces for edge protection and wrapping
- Water and heat resistant

DIMENSIONS	PK QTY	ITEM No.
50mm x 50m	24	7660717720

DOUBLE-SIDED ATTACHMENT FOAM TAPE

- High-density foam tape is coated with high strength acrylic adhesive on both sides, with red polyethylene release liner, for bonding medium to large mouldings and accessories
- High strength acrylic adhesive provides superior adhesion to plastics, metal, glass, and painted vehicle surfaces
- Used for many applications including: attaching body side mouldings, cladding, door edges, emblems, fascia rub strips, garnish mouldings, interior trim panels, rocker panel mouldings and pillar covers.

DIMENSIONS	PK QTY	ITEM No.
6mm x 18m x 1.1mm	12	63642505620
12mm x 18m x 1.1mm	12	63642505621
22mm x 18m x 1.1mm	12	63642505622

BLUE MAGNET MICROFIBRE CLOTH

- Blue Magnet is the ultimate performance cleaning cloth for general purpose applications such as dusting, drying, polishing and waxing
- Absorbs 8 times its weight in water, dries faster than chamois material and is ultra soft, reusable and machine washable
- Can be used dry or slightly damp to easily remove dirt, grease and dust from most surfaces including metal, paint, glass, plastic and leather

DIMENSIONS (mm)	PK QTY	ITEM No.
400 x 400	5	63642504402

COTTON TACK RAG

- The 100% bleached cotton (15 threads per sq inch) is coated with an adhesive resin, which picks up and retains particles effectively
- Solvent and silicon free so won't cause surface contamination

DIMENSIONS (mm)	PK QTY	ITEM No.
420 x 750	20 x 10pcs	7660708050

NON-WOVEN TACK RAG

- Polyester cloth impregnated with resin to absorb small particles and invisible dust between coats, preparing the surface prior to painting
- The non-woven construction gives strength and tear resistance

DIMENSIONS (mm)	PK QTY	ITEM No.
320 x 400	10 x 10pcs	7660708051

The background of the advertisement is a photograph of a white speedboat moving across the water, creating a large splash. The boat is angled towards the right, and the water is a deep blue. The sky is not visible, as the boat and water fill the frame.

NORTON

SAINT-GOBAIN

NORTON PAINT SYSTEM

The most effective system for preparing, mixing and spraying paints which provides a fast, clean solution allowing paint to be stored and reused. A major advantage of the Norton Paint System is that it can be used without the hard cup, the liner alone is strong enough to support the paint inside, and as it's sprayed, the vacuum inside the liner folds to reduce space and increase visibility when used at all angles, even upside-down, without leaking.

PAINT SYSTEM

- Disposable Kits
- Reusable Hard Cups
- Starter Kit
- Mixing Cups
- Paint Strainer
- Adapters & Accessories

80

NORTON PAINT SYSTEM

DISPOSABLE KIT

- Two kits are available with different mesh weights built in to the filter inside the lids: 190 μ , 125 μ and 80 μ
- Refer to the paint manufacturer's recommendation for the correct filter mesh.
- Each kit comes complete with lids with membranes, liners, rings, plugs and a mixing bar

VOLUME (ml)	PK QTY	FILTER 80 μ	FILTER 120 μ	FILTER 190 μ

POLISHING COMPOSITES

POLISHING COMPOSITES

When only the perfect finish is acceptable, use Norton Liquid Ice Xtra Cut compound and accessories. A practical solution to improve productivity, removing scratches in only one step after sanding with P2000 grade discs. Provides a high gloss finish on top and clear coat surfaces.

LIQUID ICE XTRA CUT

- Remove scratches in a single step after grade 2000 and finer
- For best results, use with hard foam or lambswool polishing heads
- Only one step is required for the most common clear coat applications, for high gloss finishing and fast application

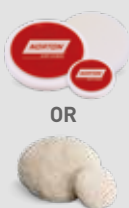

VOLUME	PK QTY	ITEM No.

POLISHING METAL

Use the Norton Rapid Polish felt flap disc with the Norton polishing compound blocks. Select the desired finish depending on your application, whether a smooth, pre-polished finish is sufficient, or a mirror shine, each compound provides a different appearance. Simply hold the block to the rotating disc and apply to the surface to polish.

NORTON RAPID POLISH

- Felt wool polishing pad without abrasive for a professional mirror shine without scratches
- Use with polishing compound blocks for best results
