# SURFACE SOLUTIONS FOR AEROSPACE MRO

  
SAINT-GOBAIN

Saint-Gobain Surface Solutions is a business partner for all your surface maintenance operations. We serve our customers locally through structured sales & technical support in over 27 countries.

Under the Norton brand, we offer abrasives, films, tapes and robotic sanding solutions tailored specifically for the aerospace industry.

## ABRASIVE SOLUTIONS FOR AERO MRO

### SANDING

**NORTON CYCLONIC® MULTI-AIR A975** – Made with super sharp ceramic A975 grain and No-Fil® technology for the ultimate cutting performance and longer product life, the colour-coded Norton Cyclonic system excels at conditioning and removal of the most demanding coatings while providing maximum dust extraction.

### CLEANING

**NORTON THIN FLEX HAND PADS** – Ideal for intermediate deburring and finishing applications, these no-woven hand pads provide maximum flexibility for consistent finishes.

### MASKING

**NORTON PLASTIFILM ULTRA** – Made from a tough, water resistant, and tear resistant high-density polyethylene+, ideally protects aircraft bodywork when spraying primer, paint or varnish.

**NORTON ORANGE TAPE** – Conforms easily to contours, adheres to most surfaces and irregular shapes, and resists high temperatures. Compatible with the most common types of paints and lacquers.

Saint-Gobain Tape Solutions

In partnership with ISYBOT, Saint-Gobain offers expertise combined with a comprehensive range of innovative solutions for robotic sanding applications.

## COBOTIZED SANDING

**ISYBOT is a Plug&Play Cobot**, which brings competitiveness and attractiveness to non-automated tasks.

The interactive Cobot improves productivity, consistency and quality while reducing the operator fatigue for processes like sanding and polishing.

Without any special training, the operator integrates and optimises the use of the Cobot by enhancing his know-how.
