SHARPENING RANGE

PROFESSIONAL QUALITY SOLUTIONS

SAINT-GOBAIN

SHARPENING RANGE

Norton's range of professional quality sharpening tools improve blade cutting performance and transform dull blades to sharp tools that last a lifetime.

The range includes **diamond stones, whetstones, a knife sharpener, sharpening rod** and an **anti-slip mat**, a full solution for different blade types from utility knives to premium Japanese blades used by cooking enthusiasts to head chefs.

Our solutions do more than simply 'sharpen' the blade. The stones can be used for **redressing** and **removal of notches and scratches**, to **sharpening** and **polishing** for a **mirror finish**.

PROFESSIONAL
SHARPENING SERIES

WHETSTONES

Each whetstone is dual sided, with a coarse side for quick sharpening of dull and damaged knives and a fine side for finishing and polishing the edges.

All whetstones feature a non-slip base for safety during use.

SCAN TO WATCH

USE	GRIT SIDE #1	GRIT SIDE #2	ARTICLE NO.	QTY	PCB
Redress blade and erase imperfections	240	1000	69078678584	1	3
Sharpening and light polishing dull blades	1000	3000	69078678676	1	3
Refine blade to a mirror finish polish	3000	8000	69078678677	1	3

MULTI-USE

Each stone provides a different level of finish

SAFETY

Non-slip base helps prevent stone moving during use

DURABILITY

High quality abrasive grain

SOAK IN WATER

For smooth sharpening action

DUAL DIAMOND STONE

The dual diamond sharpening stone has one coarse side for sharpening and a finer grade side for honing. The hard diamond grain means the abrasive can be used for all blade types, even ceramic knives.

Includes a non-slip base and plastic protective cover to prevent the stone from moving when in use.

SCAN TO WATCH

USE	GRIT SIDE #1	GRIT SIDE #2	ARTICLE NO.	QTY	PCB
Sharpening and polishing action dependent on pressure exerted	360	600	66260214859	1	3

MULTI-USE

Can be used on a wide range of blades

SAFETY

Non-slip base helps prevent stone moving during use

HARDNESS

Ideal for ceramic knives

DUAL KNIFE SHARPENER

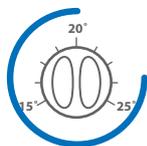

Features a diamond and ceramic abrasive for use with kitchen knives and scissors. Using the coarse diamond side first (1) sharpens the blade, followed by the ceramic side (2) for a super sharp finish. Includes a positioning dial to adjust the sharpening angle.

The non-slip rubber base prevents the sharpener moving when in use.

SCAN TO WATCH

USE	GRIT SIDE #1	GRIT SIDE #2	ARTICLE NO.	QTY	PCB
Precision sharpening of metal blades only	360	600	69078678681	1	3

ANGLE PRECISION
Select angle for precise sharpening

SAFETY
Non-slip base helps prevent movement during use

DUAL SOLUTION
Two grit solutions

KNIFE SHARPENING GUIDE

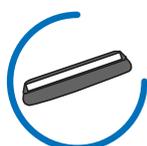

The knife sharpening guide is an easy way to keep the blade angle consistent while sharpening.

According to knife/blade, sharpening angle should be between 10 and 30 degrees.
