

TEK BOND

SAINT-GOBAIN

SEALANTS & ADHESIVES

Since 2002

Specializing in a wide variety of adhesive and sealant products including cyanoacrylate instant adhesives, PVA glues, anaerobic threadlockers, silicones and acrylics.

Serving the DIY, construction, automotive, industrial (OEM and MRO), footwear, arts & crafts and furniture industries.

A DIVISION OF SAINT-GOBAIN

SEALANTS & CAULKS

The terms Sealants and Caulks are used interchangeably as they serve a similar purpose, both are used to fill gaps between building materials.

Acrylic caulks are paintable and more rigid and used for areas with minimal expansion and contractions.

Silicones are not paintable, are more flexible and used in areas with greater expansion and contractions, while providing a watertight seal.

Acrylic and Siliconized Acrylic Caulk

Siliconized Acrylic Kitchen & Bath Caulk is waterproof, flexible, paintable in one hour, and shields against mold and mildew making it ideal for bathrooms and kitchens. This caulk is ideal for sealing a range of surfaces including glass, aluminum, masonry, granite, and wood. It takes 24 hours to be fully cured.

Siliconized Acrylic Window and Door Caulk is waterproof, flexible, paintable in one hour, and has excellent resistance to climatic variations. This siliconized acrylic caulk is designed to seal with a flexible bond on porous and non-porous surfaces including doors, glass, windows, aluminum, masonry, granite, trim, baseboards, vents, attics, and basements. Resists climatic variations such as temperature, rain, and UV rays. The clear is a great choice to blend in with surfaces.

Tekbond Painter's Caulk adheres to most common building materials and is ideal for sealing and caulking around doors, window frames, trim, baseboards, vents, attics, basements and other areas prior to painting with latex, oil-based paint, or primer. It is designed to create a durable seal in interior and exterior applications. Waterproof and can be painted as soon as 2 hours after application.

Specifications Exceed ATSM 834C

100% Silicone

100% Silicone All Purpose Sealant provides a durable waterproof seal for interior and exterior applications and is ideal for glass, metal, plastics, ceramic tile, laminate, porcelain, granite, and wood. This sealant has a temperature-resistance of 302°F (150°C) and is weatherproof, provides a barrier to mold and mildew, crack/shrink proof and rain ready in 30 minutes.

100% Silicone Window & Door Sealant was specially developed to meet a variety of surfaces. It provides a durable weatherproof seal for interior and exterior applications. This product is waterproof, permanently flexible, provides a barrier to mold and mildew, crack/shrink proof and it is 30 min water ready. Intended for sealing multiple surfaces and is ideal for window frames, doorframes, siding, trim, molding, baseboards, vents, around wires/pipes, attic and basement applications.

Silicone White Kitchen and Bath Sealant was developed for the most humid environments and is ideal for showers, sinks, tubs, tiles, vanities, countertops, fixtures, backsplashes, and other plumbing applications. It provides a durable waterproof seal and is permanently flexible, provides a barrier to mold and mildew, crack/shrink proof, and water ready in 30 minutes.

Specifications Meets ASTM C920 Class G, A, M

WHITE GLUE & WOOD GLUE

White Glue is recommended for professional and household use, Tekbond All Purpose White Glue is non-toxic, low odor, and dries transparent. Ideal for home repairs, carpentry, construction, crafts and school projects, this glue adheres more firmly and efficiently to porous materials such as paper, cardboard, fabrics, pottery, and wood than ordinary white glues thanks to its higher solids content.

Wood Glue is a fast-drying and strong-bonding adhesive that works well on all types of wood, plywood, and particleboard, making it a great choice for any woodworking project. Ideal for gluing and repairing furniture, fittings, and putters; wood assembly; and cold rolling applications. ANSI/HPVA type II water resistant making it suitable for both indoor and outdoor woodworking projects.

THREADLOCKER

115 Blue Threadlocker is a single component adhesive with medium strength indicated to small and medium nuts, bolts, and studs that require constant disassembly. It does not run and prevents corrosion, leaks, and loosening due to vibrations of the fastening set. A medium strength removable adhesive designed to clamp and seal threaded components requiring half torque. Ideal for fixation of long or small diameter screws when easy disassembly is required without damaging the screws. Specially designed nozzle allows for a vertical application without draining.

120 Red Threadlocker is ideal for locking threads, bolts, nuts, and studs of medium and large size requiring high resistance to disassembly. A permanent adhesive with high strength that protects threads from corrosion and leaks. Ideal for fixation of screws with large diameters and gaps. Specially designed nozzle allows for a vertical application without draining.

LUBRICANT

Tekbond Multi-Purpose Lubricant Spray protects against moisture and corrosion with a penetrating oil for industrial machinery, bicycles, automobiles, household parts, tractors, padlocks, hinges, locks, tools, and boats. Due to its unique formulation it acts directly on rust, stopping squeaks and preventing assemblies, parts, and metal threads from jamming. Disengages, lubricates, and protects against dryness. A quick and precise application thanks to the aerosol spray design.

SUPER GLUE

Tekbond Super Glues are a general-purpose super glue that adheres to a wide variety of materials: metals, plastics, rubbers, wood, porcelain, leather, and other materials. Tekbond Super Glue flows easily and is ideal for instances when high cure rates and excellent resistance are require. Dries in 15-30 seconds with a strong hold thanks to quick bond super glue technology. Accurately apply the desired amount of super glue with specially designed nozzle. Colorless when cured.

CONSTRUCTION ADHESIVES

Easy Nail is an alternative to nails. Tekbond Easy Nail is an easy-to-use construction adhesive that bonds on multiple surfaces such as drywall, wood, brick, masonry, concrete, ceramic tile, metal, glass, foam, and plastics and is used to fix or repair frame, panel, lining, tile, and baseboard without creating holes or marks.

Specifications Meets ASTM C557

Tekbond Construction Adhesive is an advanced all-purpose hybrid adhesive and sealant that can be used on most building materials. It is fast grab, crack-proof, weatherproof, UV-resistant and can stretch up to 400% without losing adhesion. Can be used for indoor and outdoor applications and will dry under water. It can also be used for as a caulk for sealing projects including windows, doors, trim, siding, sinks and gutters and can be painted.

Specifications Meets ASTM C920, ASTM C557 and ASTM D3498
