your
world.

FINISHES YOU'D PUT YOUR NAME ON

Norton Rapid Polish felt polishing discs will give you a finish to be proud of. Thick, dense felt material finesses the surface to create a mirror shine that is a true reflection of your work. Rapid Polish stays cool during operation at 2,000 - 3,000 RPM with no vibration, ensuring a smooth surface. Available in both depressed center discs with a 5/8"-11 or 7/8" hole, and 2" or 3" TR (Type III) quick-change discs.

Rapid
POLISH™

ENHANCE THE SHINE

We recommend applying Rapid Polish polishing compound to the face of the disc before final finishing. With no odor and little to no splatter, the compound increases cooling as you polish, while enhancing the sheen.

DEPRESSED CENTER AND QUICK-CHANGE DISCS

- Type 27 and quick-change discs with premium quality, pressed hardened felt for polishing to a mirror-like finish
- Use with or without polishing compound
- Soft padding is ideal for final finishing with no vibration
