SAINT-GOBAIN

A BRAND YOU CAN TRUST

With over 135 years' experience in abrasive manufacturing, we bring the highest quality, widest range and safest products to the DIY & Hardware channel. Whether painting or decorating, upcycling, cleaning, renovating or crafting, Norton has provided user-friendly solutions to transform surfaces in the home and garden for many years.

SAFE & INNOVATIVE SOLUTIONS

Our R&D teams work hard to develop abrasive solutions to meet the ever-evolving needs of your customers. All our cutting and grinding tools are oSa certified and undergo rigorous testing to ensure the highest levels of safety and reliability when it's needed most.

A SERVICE YOU CAN RELY ON

Backed by a team of experts, Norton offers professional service matched with product quality. We also have a fully integrated PIM system with content and images at our fingertips to support your needs and a YouTube library full of application videos easily accessed by a QR code on the packaging.

TAKING SUSTAINABILITY SERIOUSLY

We work continuously to become a more sustainable manufacturer; we're an active member of SEAM, many of our abrasives are FSC® certified, we've removed unnecessary paper from our packaging, we're moving to brown boxes and through our wide manufacturing footprint across EMEA, we're able to reduce CO₂ emissions on transport. This, combined with many other processes, contributes to reaching Saint-Gobain's goal of achieving carbon neutrality by 2050.

ABRASIVE SOLUTIONS FOR DIY & HARDWARE

The most complete range of abrasives including cutting & grinding discs, hand and machine abrasives, diamond cutting tools, wire brushes, sharpening stones and masking tapes.

NEW PACKAGING

As the original innovator of the sanding stage selection system, the Norton Expert packaging design has been created with the end user in mind, and now it's even better!

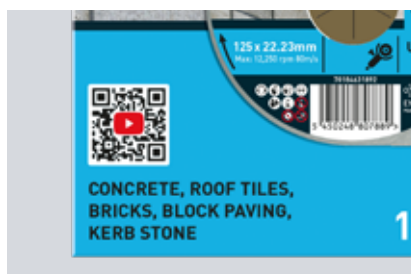

1	Stripping	Stripping and surface levelling
2	Sanding	Surface preparation
3	Finishing	Finishing before and between coats
4	Fine Finishing	Smoothing and fine finishing

IMAGE LED

Clear application images; customers recognise products 'at a glance' on a fixture.

COLOUR CODING

Across all product families colour coding easily identifies grit, sanding stage and application.

QR LINK TO VIDEOS

On the front of all Norton Expert packs is a QR link to a library of videos on the Norton YouTube channel.

MULTI-LINGUAL

Pictogram based front of pack communication with language translations explained on the back.

PROFESSIONAL VALUE FOR END USERS

A curated selection of **PRO**essional, high performance products have been included within the range, designed to offer a trade-up for consumers looking for peak performance from their abrasive.

Indicated by a '**PRO**' symbol on the front of pack, this small, specially selected range adds value to the end user across the hand and machine sanding and cutting and grinding ranges.

SEE HOW IT'S DONE

**Available to watch anytime anywhere,
'how to' application videos are available on
the Norton YouTube channel!**

For instant access, a QR code has been added to the front of each pack linking directly to the videos.

A quick scan with a smart phone will take the consumer to YouTube where they can see the products in action renovating gates, shutters, upscaling radiators, sharpening kitchen knives, and much more!

SUPPORTING SUSTAINABILITY IN THE ABRASIVES INDUSTRY

Mitigating climate change means decarbonizing our economies, and here at Saint-Gobain, the goal is simple: by 2050 we must not emit any more carbon than we absorb. We must be carbon neutral, we must preserve our planet's assets such as water and rare earth, and we must limit the waste that we generate.

This commitment is rooted in a history of reducing our environmental impact and it is inseparable from our ambition to provide our customers with solutions to decarbonize and reduce their own environmental footprint. Our net zero ambition is also a concrete expression of our purpose, Making the world a better home!

SUSTAINABILITY IS AT THE CORE OF WHAT WE DO, WE HAVE CLEAR COMMITMENTS **BUILT AROUND FIVE PILLARS:**

SUSTAINABILITY AS A DRIVER FOR GROWTH

- Decarbonisation of our customers' applications
- Environmental product declaration / Life Cycle Assessment
- Circular economy, recycling services, eco-innovation

LIMIT OUR ENVIRONMENTAL IMPACT

- Reduction of energy consumption and CO₂ emissions (Scope 1 & 2)
- Water withdrawal and reuse
- Reduction of waste to landfill, and reuse and recycle
- Increased biodiversity and reduced pollution

TAKE ACTIONS ACROSS THE SUPPLY CHAIN

- Reduction of Scope 3 CO₂ value chain emissions
- Decarbonizing our transportation
- Clear shift to greener packaging

SOLUTIONS WITH END-USERS' SAFETY, HEALTH, COMFORT AND WELLBEING AT HEART

- Customer centricity on safety, health, comfort & wellbeing
- Surface solutions to reduce vibration, noise, dust, VOC & odour, ..
- Greener solutions that respect the planet and the people

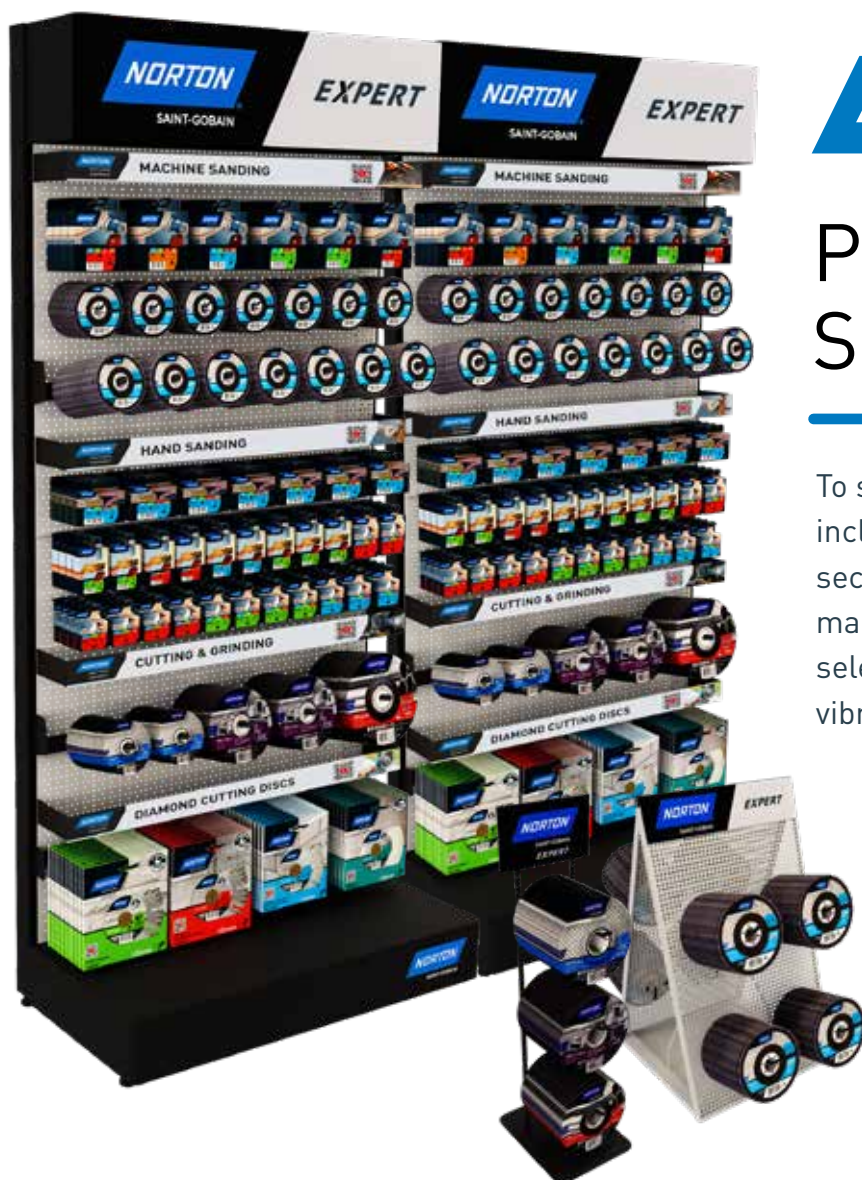

ENCOURAGE EMPLOYEE ENGAGEMENT

- Awareness and education programs
- Ambassador networks and employee ideation

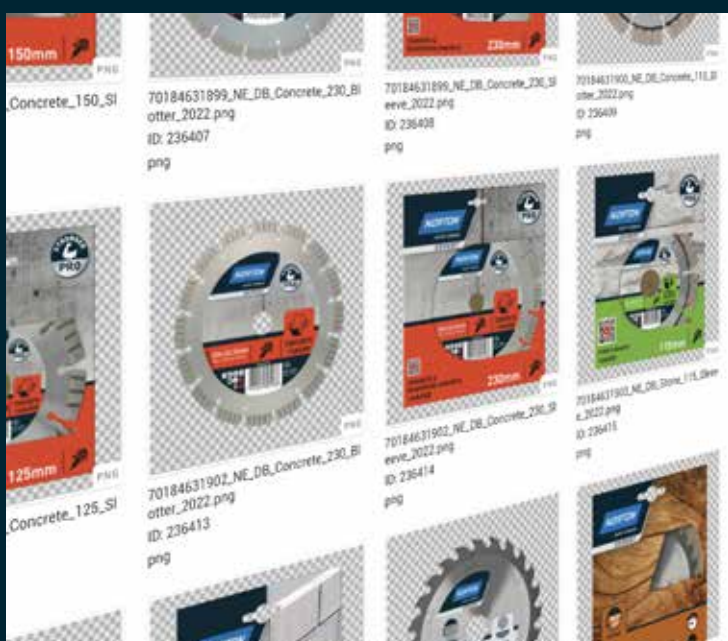

To understand more and to see practical examples of the steps that we've taken and targets that we work to, for each of these five pillars, please ask your sales representative or visit:

www.nortonabrasives.com

POINT OF SALE SUPPORT

To support selling activity visual aids including headers, bus stops and second site point-of-sale units can be made available, offering product and selection information in a professional, vibrant, educational format.

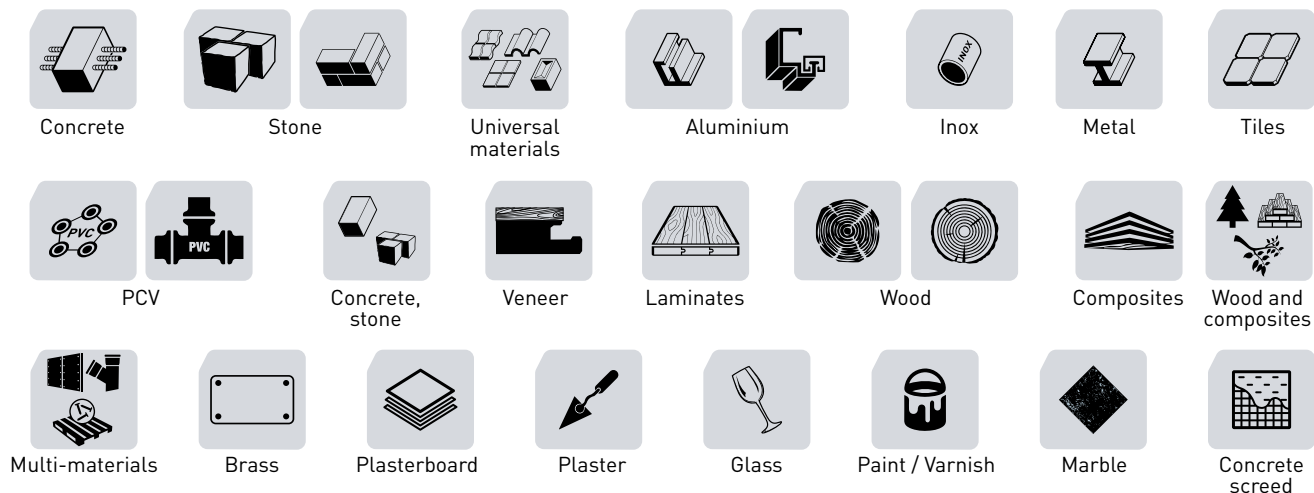

INTEGRATED PIM SYSTEM

To help your data management, catalogue and web maintenance, our integrated PIM system allows you to utilise product content in local language as well as technical data and images for all ranges.

CUTTING DISCS FOR RIGHT ANGLE GRINDERS

Norton Expert offers cutting and grinding discs, with different characteristics for use on a variety of different materials. Manufactured to the highest safety standards in our plants across Europe, we rigorously monitor and control quality and performance consistency throughout the production process.

The 'standard' range offers true expert performance. The 'PRO' range provides unique benefits to enhance performance in applications in and around the home, garden or workshop.

RANGE OVERVIEW

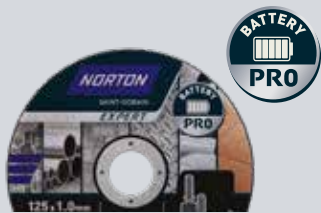

FOR BATTERY POWERED ANGLE GRINDERS

The popularity of cordless angle grinders has been rising steadily over the last few years so these discs are designed to maximise battery life whilst providing the very best in cutting and grinding performance.

EXTRA SAFE DISCS

We understand DIYers are often concerned with safety, so these discs have with additional reinforcements inside and a thicker profile for peace of mind for novice users when cutting and grinding.

MULTI-MATERIALS

A cost-effective option is a flexible disc that can do it all. Norton Expert Multi-Material cutting discs can tackle any material with speed and ease, ideal for plumbers, electricians and plasterers.

CUTTING & GRINDING STEEL & INOX

The perfect disc for cutting all types of metal, including inox and carbon steel. The PRO discs contain Zirconia grain, which performs brilliantly on inox.

Discs are available in a number of sizes for angle grinders, petrol saws and chop saws.

CUTTING & GRINDING METAL

Ideal for cutting and grinding all types of carbon steel in many different applications.

CUTTING & GRINDING STONE

Silicon carbide discs cut through natural stone, garden tiles, bricks or concrete slabs and make light work of cutting jobs when used on an angle grinder.

CUTTING ALUMINIUM

The open structure means these discs don't clog easily when cutting pipes, profiles, sheets, copper brass or bronze.

CUTTING & GRINDING DISCS FOR BATTERY POWERED GRINDERS

NORTON EXPERT PRO ULTRA THIN CUTTING & GRINDING DISC FOR STEEL & INOX

- Specially designed to consume less battery power while cutting and grinding.
- Super thin 0.8mm cutting discs help to preserve battery life, reduce noise, sparks and dust, whilst being comfortable and safe to use.
- The 3.0mm grinding discs are the best option for small grinding jobs; they're light, comfortable and easy to use.

Dimensions (mm)	Specification	Application	Box Qty.	Article Number	Barcode

125 x 3.0 x 22.23	A 30 R T27	Grinding	10	66252849464	6111252836737

NORTON EXPERT CUTTING DISC FOR MULTI-MATERIALS

- Cuts light and delicate tiles, PVC, copper, steel and stainless steel, ideal for small jobs around the home and garden.
- Thin 1.0mm profile consumes less battery power, enabling users to work for longer without recharging the machine.
- Ideal for cutting tiles to fit around obstacles including pipes, furniture or toilets.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 1.0 x 22.23	C 60 R T41	25	66252836871	5900442688819

CUTTING DISCS FOR MINI GRINDERS

NORTON EXPERT CUTTING DISC FOR MINI GRINDERS

- Norton Expert 76mm discs for cutting steel and inox are versatile and efficient for smaller jobs or hard-to-reach areas
- Cut tiles, PVC, copper, steel and stainless steel with Norton Expert Multi-material 76mm discs, perfect for small jobs around the home and garden

Dimensions (mm)	Specification	Material	Box Qty.	Article Number	Barcode
76 x 1.0 x 10	A 60 T41	Steel & inox	5	66252849414	5903112980015

EXTRA SAFE CUTTING & GRINDING DISCS FOR ANGLE GRINDERS

NORTON EXPERT PRO EXTRA SAFE CUTTING & GRINDING DISC FOR STEEL & INOX

- Contains additional reinforcements to enable cutting and grinding with one disc.
- Avoid changing the disc while working, saving time.
- Ideal for beginners as it is extra safe in both cutting and grinding jobs.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 2.2 x 22.23	A 46 R T27	10	66252849695	5903112988622
125 x 2.2 x 22.23	A 46 R T27	10	66252849696	5903112988639

NORTON EXPERT PRO EXTRA SAFE CUTTING & GRINDING DISC FOR MULTI-MATERIALS

- Contains additional reinforcements to enable cutting and grinding with one disc.
- Cuts and grinds tiles, PVC, copper, steel and inox, ideal for small jobs around the home and garden including cleaning cement from the back of tiles or creating bevelled edges on stones.
- Ideal for beginners as it is extra safe in both cutting and grinding jobs.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 2.2 x 22.23	C 46 P T27	25	66252849511	5903112983917
125 x 2.2 x 22.23	C 46 P T27	25	66252849512	5903112983924

CUTTING DISCS FOR ANGLE GRINDERS

NORTON EXPERT CUTTING DISC FOR MULTI-MATERIALS

- Sharp silicon carbide grain enables this disc to cut through many different materials.
- Ideal for plumbers and tradespeople, cutting everything from tiles to PVC tubes and copper pipes used in wet rooms.
- Great for electricians and plasterers cutting stainless steel and steel cable runners and wall structures.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 1.0 x 22.23	C 60 R T41	25	66252836871	5900442688819
115 x 1.6 x 22.23	C 46 R T41	25	66252836873	5900442688833
125 x 1.0 x 22.23	C 60 R T41	25	66252836874	5900442688857
125 x 1.6 x 22.23	C 46 R T41	25	66252836875	5900442688864
230 x 1.9 x 22.23	C 46 R T41	25	66252837321	5900442697811

NORTON EXPERT PRO FAST CUTTING DISC FOR STEEL & INOX

- Zirconia grain inside the disc enhances the cutting speed, specially on inox.
- Self sharpening, tough grain also increases the life of the disc.
- Special formulation means it will not contaminate inox.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 1.3 x 22.23	ZA 60 V T41	25	66252849389	5903112978449
125 x 1.3 x 22.23	ZA 60 V T41	25	66252849390	5903112978456

NORTON EXPERT STRAIGHT CUTTING DISC FOR STEEL & INOX

- Disc life and cutting speed is boosted thanks to the heat-treated aluminium oxide grain.
- Thinner 1.0mm discs provide a fast and comfortable high-quality cut.
- The slightly thicker 1.6mm and 1.9mm discs have longer life and the 2.5mm discs are more suitable for heavy use.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 1.0 x 22.23	A 60 S T41	25	66252835983	3157629186251

230 x 2.5 x 22.23	A 30 R T41	25	66252849642	6111252836867

NORTON EXPERT DEPRESSED CENTRE CUTTING DISC FOR STEEL & INOX

- Depressed centre discs are robust, including the 0.8mm thick PRO disc, and provide guidance for a straight cut every time.
- Ideal for cutting close to walls or in tight areas.
- The depressed centre will protect the locking nut and improve cutting visibility.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 0.8 x 22.23 PRO	A 60 Z T42	25	66252849290	8719362308502

230 x 3.2 x 22.23	A 30 R T42	25	66252835435	3157629163429

NORTON EXPERT STRAIGHT CUTTING DISC FOR METAL

- Sharp abrasive grain maximises cutting performance on all types of carbon steel metals.
- Thin disc profile offers a smooth, chip free and clean cut on thinner metal plates and sheets.
- Includes an active filler for reduced heat generation.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 1.0 x 22.23	A 60 S T41	25	66252848900	6111252836157

230 x 1.9 x 22.23	A 46 S T41	25	66252848906	6111252836218

NORTON EXPERT DEPRESSED CENTRE CUTTING DISC FOR METAL

- Depressed centre cutting discs made from high quality aluminium oxide grain.
- Comfortable to use with limited vibration through the disc.
- Thicker profile is ideal for use on thicker metal and heavy-duty applications.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 3.2 x 22.23	A 30 R T42	25	66252848902	6111252836171

LARGE DIAMETER CUTTING DISCS

NORTON EXPERT CUTTING DISC FOR CHOP SAWS AND FIXED MACHINES

- Contains an advanced grain and bond system which provides longer wheel life and burr-free cutting.
- Produces a clean, true, good quality cut throughout the long life of the disc.
- Slices through the workpiece easily without requiring a lot of pressure.

Dimensions (mm)	Specification	Box Qty.	Max RPM (m/s)	Article Number	Barcode
350 x 3.0 x 25.4	A 36 P	10	80	66252849694	5903112988615

GRINDING DISCS FOR ANGLE GRINDERS

NORTON EXPERT VISIBILITY PRO GRINDING DISC FOR STEEL & INOX

- Cut-out areas make the surface underneath visible while grinding, for better control.
- Ideal for lighter grinding jobs due to the bobbled pattern on the underside for the disc, use grit 36 for weld removal and grit 60 for defect removal.
- Reduces heat generation, reducing part damage and improving disc life.
- A36 is designed for rough grinding and A60 for light finishing

Dimensions (mm)	Specification	Application	Box Qty.	Article Number	Barcode
115 x 4.0 x 22.23	A 36 T T29	Rough Grinding	20	66252849279	5903112974533
125 x 4.0 x 22.23	A 36 T T29	Rough Grinding	20	66252849245	5903112972553
115 x 4.0 x 22.23	A 60 T T29	Light Grinding	20	66252849280	5903112974540
125 x 4.0 x 22.23	A 60 T T29	Light Grinding	20	66252849247	5903112972560

NORTON EXPERT GRINDING DISC FOR STEEL & INOX

- Contains three fibreglass reinforcements to withstand high side-load pressure for chamfering, grinding and deburring.
- Long product life thanks to a large grit reservoir and optimised bond system.
- High material removal rate and reduced vibration through the machine to minimise user fatigue.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode

NORTON EXPERT GRINDING DISC FOR METAL

- Contains three fibreglass reinforcements to withstand high side-load pressure for chamfering, grinding and deburring.
- Includes an active filler and reduced heat generation during grinding.
- Can be used to sharpen blades of garden tools.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 6.4 x 22.23	A 30 R T27	10	66252848903	6111252836188

NORTON EXPERT GRINDING DISC FOR STONE

- Tough silicon carbide grain is strong enough to grind away stone and concrete with ease.
- Can also be used for removing old mortar when re-pointing brickwork.
- Very sharp grain reduces vibration through the machine for more comfortable grinding.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode
115 x 6.0 x 22.23	C 30 R T27	10	66252849657	6111252837017

CUTTING DISC SETS

NORTON EXPERT STEEL & INOX CUTTING DISC SET X5

- Set of 5 cutting discs for cutting steel and inox.
- Thin discs are ideal for use with a cordless/battery powered angle grinder to cut thin metal sheets and plates.
- Thicker discs have additional reinforcements for cutting thicker metal.

Dimensions (mm)	Specification	Box Qty.	Article Number	Barcode

DIAMOND CUTTING DISCS

Norton Expert offers a wide range of diamond cutting discs to cut different materials. A cost competitive range with a trade up to 'Pro' which provides a fast and clean cut even on the hardest materials.

RANGE OVERVIEW

UNIVERSAL

The most versatile blades, designed to cut multiple materials including concrete, roof tiles, bricks, block paving and kerb stone.

CONCRETE & REINFORCED CONCRETE

Segments are laser welded to the steel core, for added strength when used on concrete, stone and heavy masonry.

CERAMIC & PORCELAIN TILES

Ideal for interior and exterior wall and floor tiles, provides a smooth, straight cutting edge.

STONE

Diamond cutting discs for stone also have segments laser welded to the blade core, making them extra safe for cutting even the hardest stone.

DIAMOND CUTTING DISCS FOR ANGLE GRINDERS

NORTON EXPERT FASTER PRO DIAMOND CUTTING DISC FOR UNIVERSAL MATERIALS (JET)

- 10mm corrugated rim cuts fast through the hardest materials throughout the long blade life.
- Cuts without chipping for a straight, smooth finish, even on brittle materials like roof tiles.
- Ideal for the more cost-conscious user, or lighter users looking for flexible usage from their blade.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
125 x 22.23	Jet	10	1	Wet & dry	70184631895	5450248807919

NORTON EXPERT DIAMOND CUTTING DISC FOR UNIVERSAL MATERIALS (TURBO RIM)

- The sintered segmented turbo rim provides a more aggressive cut on harder materials.
- The corrugated pattern of the rim lets air pass through, which also has a cooling effect during cutting.
- Turbo segments push material away from the grinding area for a fast cut.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Turbo	8	1	Wet & dry	70184631984	5450248807803
125 x 22.23	Turbo	8	1	Wet & dry	70184631887	5450248807834
150 x 22.23	Turbo	8	1	Wet & dry	70184631888	5450248807841
180 x 22.23	Turbo	8	1	Wet & dry	70184631889	5450248807858
230 x 22.23	Turbo	8	1	Wet & dry	70184631890	5450248807865

NORTON EXPERT DIAMOND CUTTING DISC FOR UNIVERSAL MATERIALS (JET RIM)

- Sintered corrugated rim blade for an aggressive cut on harder materials.
- Continuous rim of the diamond cutting blade provides a smooth, straight cut.
- Ideal for hard materials like roof tiles which require a clean cut.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Jet	7	1	Wet & dry	70184631891	5450248807872
125 x 22.23	Jet	7	1	Wet & dry	70184631892	5450248807889
150 x 22.23	Jet	7	1	Wet & dry	70184631893	5450248807896
230 x 22.23	Jet	7	1	Wet & dry	70184631894	5450248807902

NORTON EXPERT DIAMOND CUTTING DISC FOR UNIVERSAL MATERIALS

- Diamond segments are sintered to the blade core for dry cutting on softer materials.
- Ideal for general masonry, stone, concrete, bricks and block paving and kerb stone.
- A versatile blade for more cost-conscious users.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Segmented	7	1	Wet & dry	70184631885	5450248807810
230 x 22.23	Segmented	7	1	Wet & dry	70184631886	5450248807827

NORTON EXPERT STRONGER PRO DIAMOND CUTTING DISC FOR CONCRETE AND REINFORCED CONCRETE (TURBO LASER)

- Segments are laser welded onto the steel core for extra strength, stability and safety when cutting extremely hard materials.
- Each segment is corrugated, making the blades tough and long lasting.
- These discs can be used for dry or wet cutting, although wet is recommended, helping to remove cutting dust from the job site.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Segmented turbo laser	10	1	Wet & dry	70184631900	5450248807964
125 x 22.23	Segmented turbo laser	10	1	Wet & dry	70184631901	5450248807971
230 x 22.23	Segmented turbo laser	10	1	Wet & dry	70184631902	5450248807988

NORTON EXPERT DIAMOND CUTTING DISC FOR CONCRETE

- Sintered diamond segments for lighter, less dense concrete, such as slabs and partition walls.
- Good value for money as these concrete cutting discs can also cut other materials including bricks, blocks and paving stones.
- The gullets help to remove dust build up on the blade when cutting.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Sintered segmented	7	1	Wet & dry	70184631896	5450248807926
125 x 22.23	Sintered segmented	7	1	Wet & dry	70184631897	5450248807933
150 x 22.23	Sintered segmented	7	1	Wet & dry	70184631898	5450248807940
230 x 22.23	Sintered segmented	7	1	Wet & dry	70184631899	5450248807957

NORTON EXPERT STRONGER PRO DIAMOND CUTTING DISC FOR HARD TILES AND GRES (TURBO RIM)

- Premium diamond grade and free cutting metal bond provide strength, perfect for cutting even the hardest tiles and gres.
- 10mm continuous rim blade is the perfect choice for a clean cut.
- Reinforced flange on the steel centre helps to keep the blade straight without causing damage to the tile.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Thin continuous rim turbo	10	1	Wet & dry	70184632409	5450248817352
125 x 22.23	Thin continuous rim turbo	10	1	Wet & dry	70184631884	5450248807803

NORTON EXPERT FASTER PRO DIAMOND CUTTING DISCS FOR TILES (TURBO)

- The continuous rim provides additional cutting speed and strength on hard tiles.
- The fine diamond grains ensure a precise cut throughout the life of the blade.
- Can be used to cut interior and exterior tiles.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Continuous rim turbo	8	1	Wet & dry	70184631882	5450248807681
125 x 22.23	Continuous rim turbo	8	1	Wet & dry	70184631883	5450248807797

NORTON EXPERT FASTER PRO DIAMOND CUTTING DISC FOR TILES

- Continuous rim blade provides a smooth, chip free cut on ceramic, granite, marble, slate and quarry tiles.
- The fine diamond grains ensure a neat, clean cut throughout the life of the cutting disc.
- Can be used to cut interior and exterior tiles.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Continuous rim	7	1	Wet & dry	70184631880	5450248807667
125 x 22.23	Continuous rim	7	1	Wet & dry	70184631881	5450248807674

NORTON EXPERT DIAMOND CUTTING DISC FOR SOFT CERAMIC & PORCELAIN TILES

- Continuous rim diamond blade provides a clean cut through ceramic, glazed ceramic and porcelain tiles.
- Small blade diameter available for more intricate jobs.
- The 180mm and 200mm blades are specially designed for use with a wet tile cutter.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
76 x 10	Continuous rim	6,5	1	Wet & dry	70184631879	5450248807650
115 x 22.23	Continuous rim	5	1	Wet & dry	70184631872	5450248807605
125 x 22.23	Continuous rim	5	1	Wet & dry	70184631873	5450248807612
180 x 22.23	Continuous rim	5	1	Wet	70184631876	5450248807629
200 x 22.23	Continuous rim	5	1	Wet	70184631877	5450248807636
230 x 22.23	Continuous rim	5	1	Wet & dry	70184631878	5450248807643

NORTON EXPERT STRONGER PRO DIAMOND CUTTING DISC FOR STONE & GRANITE (TURBO LASER)

- The 10mm high segments are corrugated, generating less friction for maximum cutting efficiency.
- Segments are laser welded to the steel core for extra strength and long life of the stone cutting disc.
- Specially designed for use on granite, concrete slabs and other hard materials.

Dimensions (mm)	Blade Type	Segment Height (mm)	Pack Qty.	Wet/Dry Cutting	Article Number	Barcode
115 x 22.23	Segmented turbo laser	10mm	1	Wet & dry	70184631903	5450248807995
125 x 22.23	Segmented turbo laser	10mm	1	Wet & dry	70184631904	5450248808008

A NEW RANGE OF SAW BLADES FOR WOOD

A professional, extra safe cutting range designed for use on some of the most common materials in the home and garden, including composite worktops, fence panels, tree branches, pallets, composite decking, laminate flooring, pipes, frames, and much more! Made with tungsten carbide tips, they are comfortable to use, reducing vibration and wobbling. They also have greater heat resistance thanks to the gullet pattern. Ideal for use on circular saws, mitre saws and table saws.

CIRCULAR SAW BLADE TYPES

RIPPING BLADES

Blades for 'ripping' have fewer teeth than finishing blades, and cut extremely fast through the material, with a rougher finish.

FINISHING BLADES

Blades for 'finishing' despite having many more teeth, cut slower through the material and produce a very clean cut compared to ripping blades.

BLADE TEETH SHAPES

The shape of the blade teeth is important in defining the type of cut achieved:

ALTERNATE TOP BEVEL (ATB)

Bevelled on top, with every other tooth bevelled in the opposite direction. These blades are recommended for cross-cutting solid woods and veneered plywood. A higher tooth count provides a finer cut.

TRIPLE CHIP GRIND (TCG)

The trapezoidal teeth cut first, then the flat top teeth clean out chips and widen the cut. Ideal for really hard materials, like coated chipboards (HDF / MDF) and aluminium. This tooth type delivers very clean cuts on laminates and non-ferrous metals. These blades are made for heavy duty cuts.

NUMBER OF TEETH (TPI)

The number of teeth, or 'teeth per inch' (TPI) is the number of teeth each blade has per inch. This determines the speed and quality of cut. The fewer the number, the faster and rougher the cut. The higher the number, the slower the cut and smoother the finish. This applies to all blade types.

PACKAGING SAFETY

Unlike traditional diamond cutting discs, these blades have very sharp teeth which can be dangerous. To protect end users who still want to see the blade teeth inside the packaging, the blades are first sealed in a blister wrap, which is then packed in a cardboard sleeve which communicates its specific application.

BLADE RANGE OVERVIEW

WOOD & COMPOSITES

Designed to cut different types of wood, from hard and soft wood, wooden panels, MDF and HDF, these wood cutting blades are built for power, precision and durability.

veneer & laminates

For cutting melamine faced boards, plywood, laminated panels or sheets of HPL, we have a blade to suit every need. Ideal for kitchen worktops, panels and flooring, thanks to the precise, clean cut the blade provides.

ALUMINIUM & NON-FERROUS METALS

A specialist range of blades with carbide tips for cutting aluminium, brass, and copper. The carbide tips ensure the aluminium doesn't become sticky and clog the blade. They're also extremely hardwearing for great results, time after time.

NEW! MULTI-MATERIAL

Designed for cutting multiple materials including timber, pallets, nails and non-ferrous metals. One blade cuts it all, there's no job too large or small for the multi-material cutting discs.

BLADES FOR CIRCULAR, MITRE & TABLE SAWS

NORTON EXPERT SAW BLADE FOR RIPPING WOOD & COMPOSITES

- Wood cutting discs for rough cutting of all types of natural, soft and hard wood and composites (OSB, MDF and fibreboard).
- Ripping blades have fewer teeth and a coarser finish than finishing blades.
- The tungsten carbide tip provides long blade life.

NORTON EXPERT FINISHING SAW BLADE FOR WOOD & COMPOSITES

- A range of circular saw finishing blades optimised for cross cutting to produce a clean, smooth cut on all types of natural, soft and hard wood and composites (OSB, MDF and fibreboard).
- Thanks to the higher the number of teeth, these blades slice through the material with ease for a high quality cut.
- Long blade life thanks to the tungsten carbide tip.

NORTON EXPERT FINISHING SAW BLADE FOR VENEER & LAMINATES

- The TCG teeth cut through veneer and laminate quickly and cleanly.
- The super sharp high quality carbide tips offer extreme performance for the perfectly finished edge.
- Cuts with precision, minimal effort and comfort through melamine.

Dia (mm)	Thickness (mm)	Bore (mm)	No. of teeth	Teeth Design	Machine	Pack Qty.	Article No.	Barcode

NORTON EXPERT FINISHING SAW BLADE FOR ALUMINIUM

- High quality mitre saw blades with TCG negative angled teeth specially designed for cutting aluminium, can also cut brass and copper tubing, rails and pipes.
- High strength carbide teeth are ultra-hard wearing and the negative hook angle maintains a powerful, clean cut time after time.
- Long lasting, durable blade ideal for plumbing and light building jobs.

JIGSAW & RECIPROCATING SAW BLADES

Jigsaw and reciprocating saw blade teeth are made from one of four types of metal: high speed steel, high carbon steel, bi-metal or tungsten carbide.

High Carbon Steel (HCS)

Very flexible blades and ideal for general purpose jobs on soft materials like tree branches, pallets and other soft woods.

Tungsten carbide (TCT)

Great heat resistance and better durability than other blade types. Instead of having teeth, their cutting edge is coated in a tungsten carbide grit. Recommended for use on steel, porous concrete and fibre cement.

Bi-Metal (BIM)

The body of the blade is made from carbon steel and the teeth from high speed steel. This gives the advantage of both flexibility and wear resistance. Ideal for use on hard woods and metal.

High Speed Steel (HSS)

Harder and more durable than HCS blades, although not as flexible. High-speed steel blades are ideal for small jobs on metal or aluminium, where fast cutting is the main objective.

JIGSAW BLADES

NORTON EXPERT JIGSAW BLADE FOR WOOD AND COMPOSITES

- Norton Expert jigsaw blades provide power, precision, durability and long life.
- Achieve a fast, clean cut through a variety of different natural and man-made wood materials including timber, softwood, chipboard, wood core plywood, fibreboard laminated panels, doors and kitchen worktops.
- Ideal for lighter DIY jobs to heavier building work.

THE SECRET TO A PERFECT FINISH

1	Stripping	Stripping and surface levelling
2	Sanding	Surface preparation
3	Finishing	Finishing before and between coats
4	Fine Finishing	Smoothing and fine finishing

Using a sequence of grits is key to achieving the perfect finish and using a numbered and colour coded system to represent each grit number and stage of sanding, we're able to help the end user understand the most suitable product for their job.

Each colour, stage, grit number and description are clearly printed on the front of the packaging and explained further on the back, making product selection at the point of sale as quick, hassle free and simple as possible.

See Norton hand and machine abrasives in action in the video 'How to renovate a wooden shutter'.

FSC® CERTIFICATION

Look out for our FSC®-certified products. By choosing FSC®-certified products, you are supporting responsible management of the world's forests.

PACKAGING FORMATS

RETAIL PRE-PACKS

Designed to be displayed from merchandising hooks in store. Small pack quantities, bespoke product communication, ideal for a DIY environment.

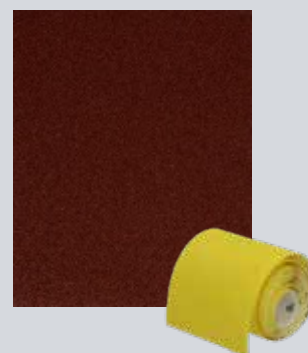

BLISTER PACKS

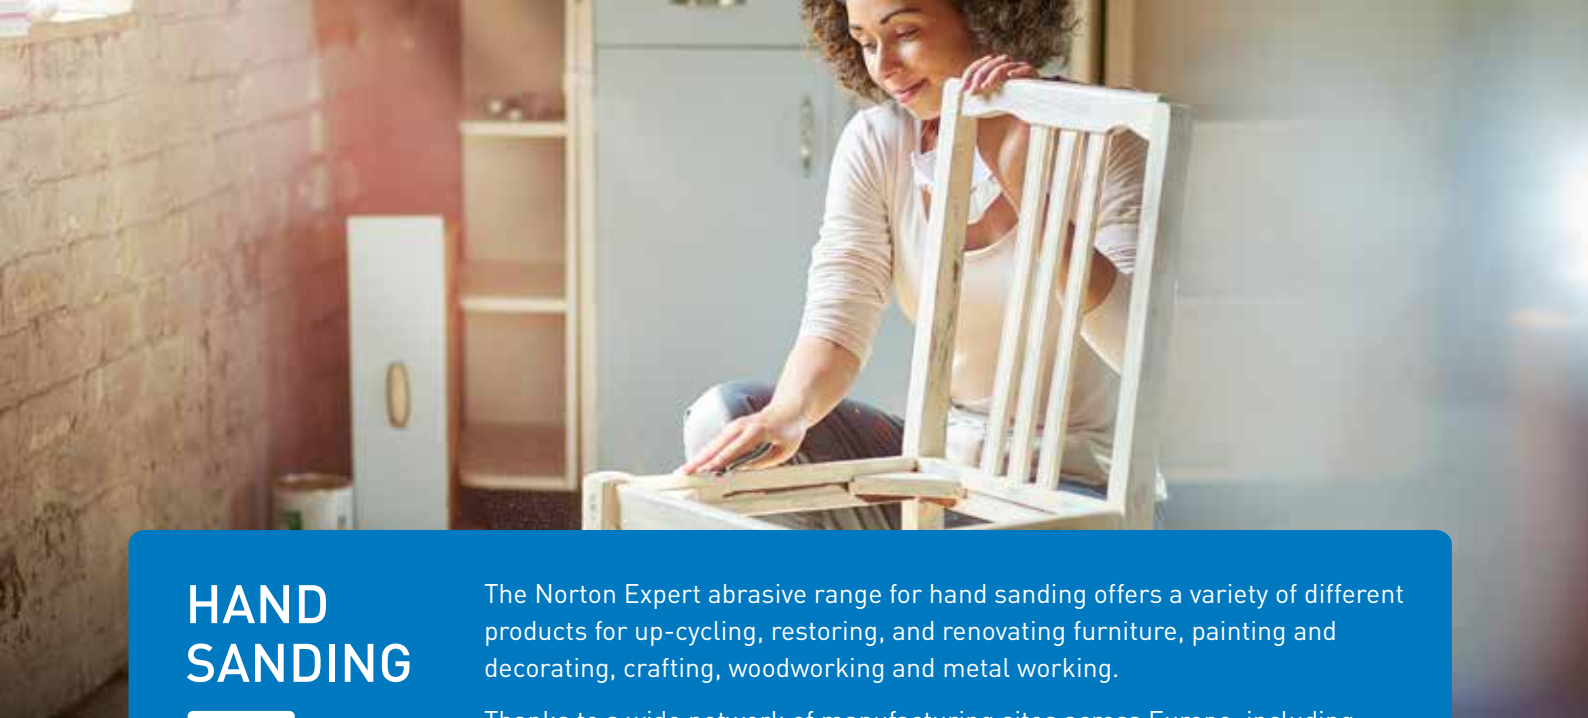

Abrasives are shrink-wrapped inside a blister pack with a bespoke insert detailing product information. Blister packs come in shelf ready boxes which can be opened to display the packs inside.

SINGLE UNITS

Products are packed in bulk quantities for single unit selling. Applies to sheets, rolls and some sanding blocks, which each have a sticker, with barcode applied to them.

HAND SANDING

The Norton Expert abrasive range for hand sanding offers a variety of different products for up-cycling, restoring, and renovating furniture, painting and decorating, crafting, woodworking and metal working.

Thanks to a wide network of manufacturing sites across Europe, including sandpaper from France and non-wovens from Portugal, we are able to reduce our transportation footprint, ensure quality is controlled within our plants and provide excellent service to our customers.

SANDING SHEETS

Single unit aluminium oxide sheets come in paper and cloth backed varieties for use on wood, paint, plaster and metal. Silicon carbide waterproof sheets excel on metal and can be used wet or dry.

SANDING ROLLS

A number of abrasive types and backings are available in Norton Expert rolls. What's more, rolls are cut to different lengths from 1m to 5m for bigger or smaller sanding jobs.

SANDING SPONGES

Many end users often prefer to sand using abrasive sponges, thanks to their ability to conform to contoured surfaces and get into tight corners. They're also easier to grip for a more comfortable sanding experience.

NON-WOVEN ABRASIVE PADS

Ideal for cleaning and removing surface coatings, creating a key prior to painting and cleaning glass, plastic and chrome surfaces without scratching. Norton abrasive pads are flexible, washable and reusable and can be used wet or dry.

SANDING TOOLS & BLOCKS

Sanding tools support the use of abrasive, providing an ergonomic grip and giving a more even finish. Two size blocks are available which can be used with Norton Expert sandpaper sheets or rolls, when torn to size. In addition, new to the range is a coarse silicon carbide block, ideal for rough sanding jobs on plasterboard, concrete screed and removing old layers of paint, varnish and plastic coatings.

SANDING SHEETS

NORTON EXPERT MULTI-PURPOSE CLOTH SANDING SHEETS

- Strong cloth backing provides great flexibility for sanding curved and contoured surfaces.
- Sharp aluminium oxide grain removes paint, metal and varnish from wood with ease and can also be used on metal.
- Can be used alone, with a sanding block, clip fixing electric or cordless sander.

NORTON EXPERT MULTI-PURPOSE WET AND DRY SANDING SHEETS (SILICON CARBIDE)

- High performance silicon carbide sandpaper can be used wet or dry; wet use affords a cleaner surface while sanding.
- Achieve fast material removal and a smoother and brighter finish, ideal for use on lacquered surfaces and metal.
- Can be used alone, with a sanding block, clip fixing electric or cordless sander.

MACHINE SANDING

The Norton Expert abrasive range for machine sanding offers a variety of different products for up-cycling, restoring, and renovating furniture, painting and decorating, crafting, woodworking and metal working.

Thanks to a wide network of manufacturing sites across Europe, including sandpaper from France and non-wovens from Portugal, we are able to reduce our transportation footprint, ensure quality is controlled within our plants and provide excellent service to our customers.

RANGE OVERVIEW

SANDING BELTS

Sanding belts are available in a range of dimensions for use on small to large surface areas. Made with strong cloth backing, all belts can be used with any machine brand for excellent results on wood, paint and metal.

SANDING CUT SHEETS

Perforated and non-perforated sheets are available in four grit grades for stripping to finishing on self-grip and clip fixed machines. Available in standard sandpaper and mesh abrasive for the ultimate dust extraction.

DELTA SHEETS

Available for use with most brands of detail sanders, Norton Expert sheets offer a product for every stage of the sanding process. Saves time when sanding large areas and can access corners and tight spaces that other abrasives can't. Perforated sheets available for better dust extraction.

SANDING DISCS

From 115mm to 225mm, discs are available for use on machines from orbital sanders to giraffe sanders. All discs are self-gripping and perforated for better dust extraction.

FIBRE DISCS

Another aggressive disc type, fibre discs grind away metal and wood quickly, making light work of tough paint or rust removal jobs. They're strong and resilient thanks to the thick fibre backing.

FLAP DISCS

For the ultimate material removal and stripping jobs, flap discs are the best product for the job. For use with an angle grinder, they're very aggressive making them ideal for removing welds and stubborn paint layers or rust from metal.

SEMI-FLEXIBLE DISCS

The ultimate hard wearing aggressive disc made with silicon carbide is used for surface cleaning and grinding of concrete, marble and stone. The silicon carbide grain breaks down under pressure when used to produce new cutting edges which always stay sharp.

NON-WOVEN DISCS

Norton non-woven discs are strong nylon fibre infused with abrasive grains for stripping and tough cleaning rust, corrosion and weld spatter from metal and old paint and varnish layers from different types of wood. Discs are available for use with drills and angle grinders.

POLISHING DISCS

Durable and resistant, Norton Expert buffing discs can meet the most demanding polishing needs, from bright polished to the highest quality mirror finishes. For use with a drill, they can be used with or without a compound and offer great results even on curved and contoured surfaces.

FIBRE DISCS

NORTON EXPERT FIBRE DISCS

- Aluminium oxide fibre discs are tough and versatile, ideal for use with an angle grinder on metal.
- The heavy weight backing supports aggressive use for demanding sanding jobs, even resists tearing when sanding wood with nails.
- Removes light welds and weld spatter from metal.

FLAP DISCS

NORTON EXPERT PRO FASTER FLAP DISCS

- Contains a high percentage of self-sharpening zirconium abrasive, which makes light work of removing rust, paint and coatings from metal when used at low and medium pressure.
- Flap discs cut faster and provide a better finish than fibre discs when removing light welds.
- Long lasting thanks to the flap construction and anti-loading properties on aluminium and soft materials.

NON-WOVEN RAPID STRIP DISCS

NORTON NON-WOVEN RAPID STRIP DISCS FOR METAL

- Strong nylon fibres infused with sharp silicon carbide grain for powerful stripping jobs.
- Removes rust oxidation on garden furniture, gates and even car body work. Can be used on large flat surfaces as well as small intricate shapes.
- Very quickly strips the surface, whilst maintaining metal integrity throughout the long disc life.

WIRE BRUSHES & POLISHING ACCESSORIES

Norton wire brushes offer a great alternative to traditional abrasive products for stripping coatings from metal, wood and stainless steel. Two types of brushes are available; steel wire for stripping and cleaning metal and wood, and nylon wire for wood. Both types are available in different shapes, sizes and wire diameters, for use with drills and angle grinders to satisfy different stripping and cleaning applications in and around the home and garden.

		HEAVY STRIPPING		STRIPPING			CLEANING		POLISHING	
		HARD		MEDIUM			LIGHT		SOFT	
		Used on steel surfaces that require a tough stripping. Typical applications include removing heavy corrosion, weld cleaning, stock removal and rough surface preparation.		Ideal for cleaning, renewing and refreshing wood, steel and stainless steel. A great choice when faced with dirty, tarnished, or rusty surfaces.			Brushes for smoothing, removing light rust, paint and burrs from a surface.		For polishing and finishing metal, plastic, glass, marble and stone surfaces.

WIRE BRUSHES FOR ANGLE GRINDERS

NORTON TWIST KNOTTED WHEEL BRUSHES FOR HEAVY STRIPPING METAL

- Thick steel wire diameter with rigid structure for very fast, aggressive stripping of garden furniture, machinery and tools.
- Wheels with a safety guard protect the user against dust and particles generated when in use.
- Wheel brushes are ideal to access corners, channels and hollows.

Dimensions (mm)	Wire dia. (mm)	Pack Qty.	Box Qty.	Article Number	Barcode

SHARPENING STONES FOR KITCHEN & GARDEN TOOLS

PROFESSIONAL
SHARPENING SERIES

Norton's range of professional quality sharpening tools improve blade cutting performance and transform dull blades to sharp tools that last a lifetime. A full solution for different blade types from utility knives to premium Japanese blades used by cooking enthusiasts to head chefs. Our solutions do more than simply 'sharpen' the blade.

The stones can be used for redressing and removal of notches and scratches, to sharpening and polishing for a mirror finish. In addition, the Norton Expert range offers a variety of shapes and sizes of stone for different blades found in the home and garden.

NORTON WHETSTONES & ANTI-SLIP MAT

- Dual sided stones with a coarse side for quick blade sharpening and fine side for finishing and polishing.
- High quality abrasive grain provides long life and excellent durability for a sharp finish every time.
- Contains an anti-slip silicon mat, for additional safety when using the whetstone.

Legend: ● Recommended ◐ Suitable

** Determine if paint is cured, see manufacturer's recommendation for time interval before fresh paint surface can be washed.

Wall coverings vary greatly so it's important to test tape removability on an inconspicuous area before application.

NOTE: THIS TABLE IS OFFERED AS A GUIDE ONLY.

It is the user's responsibility to determine the suitability of the product for its intended use.

NORTON PAINTER & DECORATOR MASKING TAPE

- Crepe paper provides flexibility to conform well to contoured and curved surfaces.
- Easy to remove; peels off without breaking
- Rubber adhesive provides instant adhesion to a variety of indoor surfaces including glass, wood, paint, aluminium, steel and drywall.

Dimensions	Pack Qty.	Box Qty.	Article Number	Barcode

NORTON FAÇADE MASKING TAPE

- A strong, waterproof tape for internal and external use on porous surfaces.
- Heavy duty cloth combined with UV stabilised rubber adhesive makes this tape tough and hardwearing even after 14 days adhesion.
- A professional grade solution for use on concrete, stone, brickwork and roof tiles, as well as windows, glass and wood.

Dimensions	Pack Qty.	Box Qty.	Article Number	Barcode
24mm x 25m	1	24	78072710032	8719362236331

48mm x 25m	1	12	78072710034	8719362236355

NORTON SAMURAI MULTI-SURFACE MASKING TAPE

- Washi tape is completely flat, resisting bleed-through for sharp paint lines.
- Medium adhesion and excellent UV resistance even after long exposure to sunlight (up to 14 days) adhesion is still effective.
- Conforms well to all surfaces and has high tensile strength in the most demanding applications inside and outside, including cured paint, skirting boards, ceilings, PVC, metal and glass.

Dimensions	Pack Qty.	Box Qty.	Article Number	Barcode
24mm x 50m	1	24	78072710028	8719362236300
