PRO UNIVERSAL LASER DIAMOND BLADE RANGE

PRO UNIVERSAL LASER

FEATURES & BENEFITS

- Change of the design: allows better evacuation of the dust and improves the visibility for the operator while cutting.
- Blade grooves reduce the contact surface with the material which minimises friction and ensures the cutting process is easier for the user.
- The shape of the segment indicates the direction of rotation of the blade for easier mounting.
- Segment height : increased from 10mm to 12mm which increases the life of the blade.

OLD DESIGN

NEW DESIGN

Ideal for concrete and building materials the Norton Clipper **PRO UNIVERSAL LASER** includes diameters from Ø115mm to Ø350mm. With a new iHD manufacturing process the segments are now denser, particularly in the backing, ensuring optimum safety against segment loss.
