 SAINT-GOBAIN

NORTON

SAINT-GOBAIN

DESIGNED FOR PROFESSIONALS. CRAFTED FOR PERFECTION.

Sanding is intensive; every vibration, every grip, every motion can lead to operator fatigue and discomfort. That's why the Norton electric sander range, designed exclusively by Saint-Gobain professionals, for professionals is made with advanced ergonomic engineering. Every element, from weight distribution to grip design, has been optimized to reduce strain and improve operator comfort during extended use.

A COMPLETE SANDING SOLUTION

The lightweight machines deliver outstanding power in a compact, ergonomic design, providing complete control and effortless handling. Their performance and versatility makes them the perfect solution for automotive, marine, aerospace, and industrial sanding applications. When paired with the Norton Cyclonic® abrasive sanding system, they unlock superior surface preparation and finishing results, every time.

The new range offers machines for every application, engineered to take you from coarse sanding to fine finishing with unmatched efficiency and optimal safety.

Experience the next level of sanding - where innovation meets craftsmanship, and performance is redefined.

EXCELLENCE IN EVERY DETAIL

The new Norton electric sanders take all the strength and reliability found in market-leading pneumatic and electric machines, and combine them into compact, lightweight and ergonomic tools.

MACHINE FEATURES

Unmatched power-to-size ratio

Delivers 350W of power and speeds up to 10,000 rpm in a compact design for maximum comfort.

Comfortable grip

No throttle lever means maximum comfort and easy one-handed control for use during long periods without fatigue.

Front-mounted power switch

Machine can be powered on and off at the touch of a button, ensuring complete safety and preventing accidental machine start-ups.

Excellent dust extraction

For maximum performance, a cleaner working environment and prolonged lifetime of the abrasives.

Maximum control

Reactive braking system stops the pad moving immediately on shut down.

Long-life electric brushless motor

Guarantees reliability and efficiency: low energy consumption without sacrificing power.

Recycled plastic

Machine housing is crafted partially from recycled plastic.

Effortless motion

Low vibration and reduced noise guarantee a smoother, fatigue-free experience.

LED indicators

Illuminate to give clear visibility of machine rpm.

Fixed cord

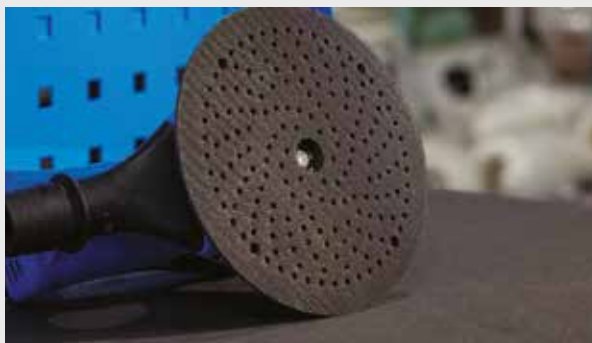

Highly flexible cord with strong connection, preventing breakdown and loose contacts.

Direct vacuum connection

No need for extra bulky adapters. Connection rotates freely, ensuring complete manoeuvrability during sanding, even in remote spots.

Extra-wide space

Additional finger-clearance improves control and reduces operator fatigue during vertical sanding process.

NEW NORTON CYCLONIC® BACK-UP PAD

Featuring the Norton Cyclonic® hole pattern, the back-up pad is engineered to deliver maximum sanding efficiency and productivity.

Its low-profile design keeps the sander close to the surface for superior control and precision. The robust, purpose-built fixing system ensures a secure connection to the machine while making pad changeovers quick and easy, without risking damage to the reactive brake system. The high concentration of holes eliminates the need to spend time aligning the disc with the back-up pad - simply stamp the back-up pad on to the disc!

DETACHABLE POWER SUPPLY

Designed as a standalone unit, it reduces the overall size and weight of the tool to a minimum. It can also be securely clamped onto the vacuum hose. Its compatibility with the full range of Norton electric sanders provides flexibility and convenience, whether you're purchasing a new sander or dealing with a malfunction.

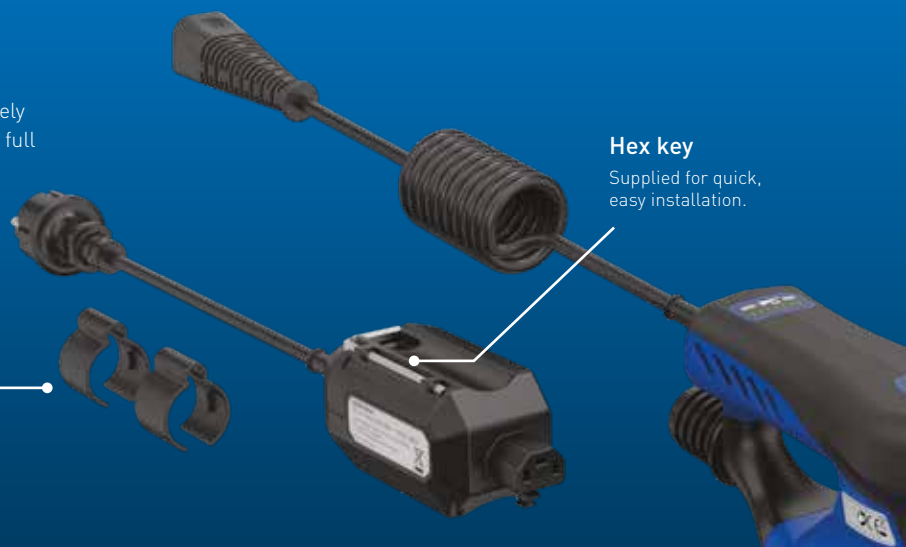

The hex key for changing the backup pad is always included and easily accessible on the power supply.

Cable clips

Included with all electrical sanders. The clips can easily attach the electrical cord to the vacuum hose, ensuring a safe and tidy work area.

Hex key

Supplied for quick, easy installation.

CYCLONIC[®]
MULTI-AIR

DRIVE EFFICIENCY WITH NORTON CYCLONIC[®] & THE ELECTRIC SANDER RANGE

In the fast-paced world of refinishing, precision, speed and finish are everything. The **Norton Cyclonic[®] Sanding System** – trusted by professionals across the industry – delivers outstanding surface preparation and dust extraction.

Now, paired with the new **Norton Dual Action Electric Sander**, you get a complete solution designed to elevate every work flow, not just in automotive refinish but across marine, aerospace or industrial applications too.

NORTON CYCLONIC DISC & ROLL DISPENSER

The ideal solution for quick and easy abrasive application

SCAN TO FIND
OUT MORE

Norton Cyclonic is a unique colour coded sanding system of discs and rolls, providing the perfect surface finish for jobs from heavy duty stripping to final finishing. When used together, the combination of **Norton Cyclonic** and **Norton Electric Sanders** is a game-changer for automotive, marine, aerospace and industrial applications.

ADVANCED DUST EXTRACTION

Thanks to the unique Cyclonic hole pattern, productivity is improved by up to 32% compared to conventional multi-hole discs maximising dust removal. When paired with the extraction power of the Norton Electric sander range, whether using discs or sheets, achieve maximum dust removal, cleaner panels, and better visibility for precision work.

CONSISTENT CUT, LONGER LIFE

Engineered with ceramic abrasive grain and No-fil® anti-loading technology, Cyclonic discs and rolls maintain a sharp cut and resist clogging, reducing downtime and improving throughput.

OPTIMISED CUTTING POWER

The sander's variable speed and low vibration allow technicians to get the most out of Cyclonic's high-performance ceramic grain, delivering fast, consistent cutting across filler, primer, and topcoat.

EFFICIENCY THAT DRIVES THROUGHPUT

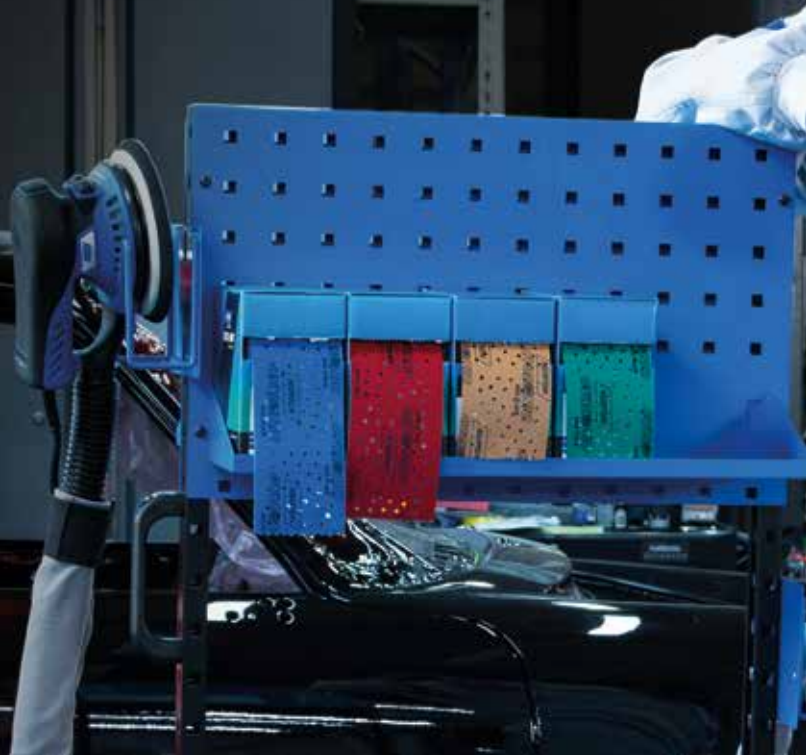

Less clogging, fewer abrasive changes, and ergonomic handling mean faster cycle times and reduced rework, improving productivity without compromising on quality.

EVERYTHING YOU NEED, ALL IN ONE PLACE

NORTON WORKING STATION & SMART STATION

Boost workshop efficiency, space and time with the Norton Working Station & Smart Stations, mobile units that keep tools and materials organised and within easy reach.

NORTON WORKING STATION

Designed for efficiency

The Norton Working Station is a fully mobile unit that can store the Cyclonic® dispenser, Norton Vacuum, sanding machines and a wide range of abrasives and accessories. It creates a cleaner, more organised workspace and helps keep essential tools within easy reach.

Ready for the demands of a busy workshop

The trolley can be customised to suit different work flows, allowing each operator to arrange tools, pads, rolls and machines in a way that supports their process.

Work side by side

The mobile design enables two operators to work simultaneously from the same organised system, improving throughput and reducing downtime.

Working Station:
66254427951

Vacuum Systems:

CV4E 40 L : Low hazard filter class: 78072754265
CV4E 40 M : Medium hazard filter class: 78072754268

NORTON SMART STATION

Compact, organised and mobile

The Norton Smart Station keeps the Cyclonic® dispenser, sanding machines and accessories within easy reach. When attached to the Norton Vacuum, it becomes a complete mobile sanding setup that supports clean, efficient working practices.

Cleaner, safer workspace

By keeping tools neatly stored and easily accessible, the Smart Station helps reduce workspace clutter and supports safer working conditions. The integrated Cyclonic® dispenser ensures abrasives are protected, organised and simple to access.

Perfect for detail work and mobile operators

The Smart Station is ideal for smaller work areas, on-site jobs and any environment where portability and organisation are key.
