NORTON CLIPPER DIAMOND BLADES

Norton Clipper Diamond blades are designed for extended tough cutting of building materials, stone, tile, brick, asphalt, limestone, pipe, rebar etc. They are available with different rim or edge configurations including segmented, continuous, turbo and ultra thin , they deliver exceptional speed of cut and long life.

* Only selected models shown, any additional information or requests, please contact us.

Diamond blade for Construction Materials - Segmented

For cutting general building materials: concrete rims and paving slabs, concrete blocks and clay bricks, silicates.

Features:

- 8 mm segment, longer life
- Ring size fits on all machines
- Premium diamond and metal bond for high speed of cut
- Dry and Wet cutting

Diamond blade for Tiles and Stone - Continuous

For cutting ceramic, porcelain tiles, terracotta, natural stones: limestone and marble.

Features:

- Continuous rim for precise cut on delicate materials
- Premium bond helps to reduced chipping of workpiece
- Only for Wet cutting

Diamond blade Universal - Turbo

For cutting hard and fragile building site materials: roof tiles, clinker bricks and tiles, concrete paving slabs.

Features:

- Corrugated continuous rim with premium specification
- Smooth and easy to use, great quality of the cut in a wide range of materials
- Dry and Wet cutting

Diamond blade for Soft and Hard Tiles - Ultra Thin

For dry cutting of tiles or wet cutting of thick/hard tiles.

Features:

- Ultra thin for fast cutting
- Recommended to use Wet cutting for hard tiles
