

CHOOSING THE RIGHT TOOLS

Whether you are cutting, sanding, stripping or grinding wood or ferrous/non-ferrous metal, Norton Clipper offers an extensive range of abrasive solutions for joiners and carpenters.

Choosing a high-quality Norton Clipper product can equip you with the safest and best performing construction blades, machines and abrasives that not only help to improve your personal comfort but contribute to a greener environment.

Choosing premium quality sanding products is key to taking the hard work out of the finishing and painting process with extremely reliable sanding. As soon as you see signs of wear and tear, you should look to replace your abrasives. For advice on sanding stages and grit scales, please refer to the table below.

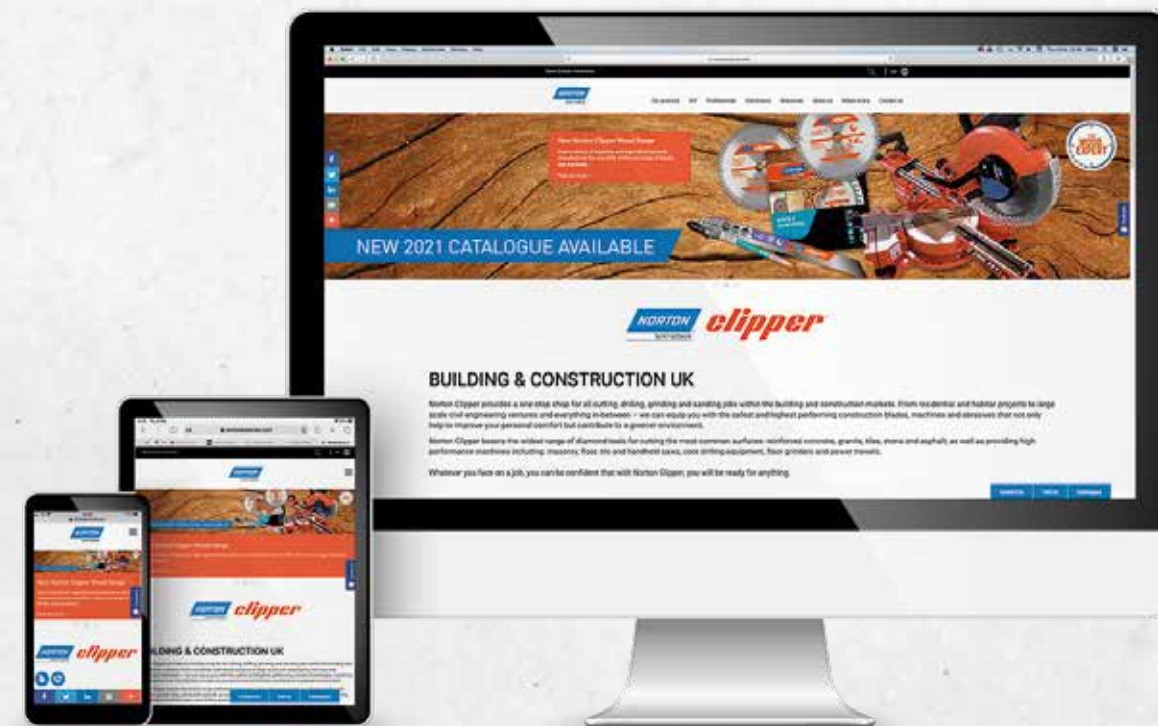

ABRASIVE GRIT GRADE GUIDE:

GRIT	APPLICATION
60 to 80: Coarse grit	Heavy stripping
100 to 120: Medium	Semi-finishing
160 to 240: Fine grit	Finishing
320 to 600: Very fine grit	Smooth finishing

For small hand-sanding operations, use multi-purpose sheets for wood, metal and paint. When sanding curved or hard-to-reach areas, use super-flexible sheets.

For sanding all types of parquet flooring, Norton Clipper offers a range of belts and discs specifically suited to floor sanders. For stripping and polishing floors, use non-woven discs for the best results.

When cutting and deburring metal and stainless steel, we advise you to use cutting wheels that are free of iron, sulphur and chlorides to avoid any contamination.

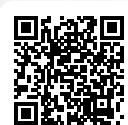

Visit www.nortonabrasives.com and check out our trade guides, literature, datasheets and demonstration videos.

With just a few clicks, discover the specifications and advantages of our machines and consumables.

See our recommended products for each trade to guide contractors, tilers and carpenters.

JOB FOCUS

From simple renovations to extensive new builds, Norton Clipper offers a number of blades and machines for all professional cutting, sawing and drilling applications.

When it comes to working with wood and metal, whether functional or decorative, inside or outside the home, as the experts, you can count on Norton Clipper for quality products that provide outstanding results.

CUTTING TOOLS

CUTTING WOOD AND METAL

For angle grinders, handheld cut-off saws and workshop machines

PRO UNIVERSAL DUCTILE DIAMOND BLADE

For dry cutting soft materials, such as PVC, composites, timber, ductile iron and light metals.

FEATURES

Vacuum-brazed segment blade. Recommended for semi-intensive use.

METAL-INOX TYPE 41/42 CUT-OFF WHEELS

For cutting metal and stainless steel. Very high cutting precision.

FEATURES

Straight cutting disc providing long life, durability and high material removal

123 - METAL-INOX TYPE 27 CUT-OFF WHEELS

For cutting, light grinding and polishing metal and stainless steel.

FEATURES

Excellent and uniform finish. Cost-effective solution.

MACHINE SANDING

SANDING UNFINISHED WOOD & PAINTED WOOD

For belt sanders, sheet sanders, eccentric/orbital sanders and detail sanders

BELTS

Reversible for quick and easy fitting.

FEATURES

For roughing down large even surfaces.

CUT SHEETS

For applications from stripping to finishing on wood, paint and metal.

FEATURES

Ideal for finish-sanding.

SELF-GRIP DISCS

Self-grip aluminium oxide discs. 6/8/9 holes.

FEATURES

Ideal for roughing, intermediate sanding & finishing of solid wood.

DELTA SANDING SHEETS

Triangular aluminium oxide sheets. Abrasive can be changed quickly and easily when stripping, sanding or finishing wood, paint or metal surfaces.

FEATURES

For sanding hard-to-reach areas.

SANDING FLOORS

For floor sanders

RED HEAT - R955

Very strong polyester cloth backing for long life and tear resistance.

FEATURES

Ideal for professional floor sanding of hard wood across large areas.

PLAIN DISCS

Plain discs with aluminium oxide abrasives

FEATURES

Ideal for roughing, intermediate sanding & finishing of solid wood floors

BEARTEX FLOOR PADS

Beartex offers a wide range of floor pads from stripping right through to mirror gloss finishing.

FEATURES

Recommended for cleaning, polishing and finishing parquet flooring.

MACHINE SANDING

STRIPPING, CLEANING & FINISHING WOOD & METAL

For angle grinders.

FLAP DISCS

Zirconia grain for fast material removal and excellent finish on wood, paint and metal.

FEATURES

Available in a range of sizes.

NON-WOVEN DISCS FOR METAL & STONE

Nylon fibre disc impregnated with silicon carbide grains for powerful stripping.

FEATURES

For stripping and cleaning rust and paint from metal surfaces and cleaning stone. Leaves surfaces clean and ready to paint.

NON-WOVEN DISCS FOR WOOD

Nylon fibre disc impregnated with aluminium oxide grains for powerful stripping.

FEATURES

For stripping and cleaning paint and varnish from hard wood surfaces, such as shutters and doors.

HAND SANDING

SANDING WOOD, PAINT AND METAL

Hand-sanding solutions

MULTI-PURPOSE SHEETS

Good results on all types of surface.

FEATURES

With a light paper backing providing flexibility for comfortable sanding.

SUPER FLEXIBLE SHEETS

Ideal for sanding curved or contoured surfaces on bare, painted and varnished wood.

FEATURES

Made with a flexible and resistant cloth backing

SANDING BLOCK AND REFILLS

Ergonomic foam block is comfortable and easy to use; available with or without refills.

FEATURES

Ideal for use on small, flat, wooden, painted or metal surfaces.

HANDY ROLLS

The soft cloth-backed roll can be cut to the required length for easy use and handling.

FEATURES

Solution for stripping, deburring and finishing curved and hard-to-reach areas, such as pipes.

WOOD RANGE

FOUR APPLICATIONS, FOUR GREAT RANGES, FOR PROFESSIONALS

We have the blade you're looking for.

WOOD & COMPOSITES

A complete collection of blades and cutting solutions for the professional woodworker.

FEATURES

Encompassing solutions for hard and soft wood, wooden panels, OSB, MDF, and HDF, these blades are built for power, precision and durability.

MULTI-MATERIALS

Specialised teeth and anti-recoil support allows the Multi-Material range of blades to cut through a vast array of material types with ease.

FEATURES

Designed with cutting construction timbers, pallets, nails and non-ferrous metals in mind. Concerns about damaging these blades are a thing of the past.

VENEER & LAMINATES

Super sharp high quality carbide blades offer extreme durability and performance for the perfectly finished edge.

FEATURES

Whether you need to cut melamine faced boards, plywood, laminated panels or sheets of HPL, we have a professional blade to suit.

ALUMINIUM

Outstanding strength and durability to slice through aluminium.

FEATURES

This is Norton Clipper's specialist range of blades suited to cutting aluminium, brass, and copper. Blades that cut powerfully and sustainably time-after-time.

MITRE SAW

Ideal for making precise cuts at a variety of angles with the help of a spinning blade.

FEATURES

Front bevel control offering a range of 45° right to 45° left for precision cutting. Includes vertical vice, dust bag and blade wrench.

STAND

Durable steel structure mitre saw stand.

FEATURES

Compact folding design for easy storage and portability. Telescoping extends up to 2520mm for added support. Suitable for Norton Clipper mitre saws and most brands of mitre brands.
