## WIRE BRUSHES AND POLISHING ACCESSORIES

MORE COMFORT | MORE QUALITY | MORE SAFETY | MORE SIMPLICITY

Reshaping your world.

SAINT-GOBAIN

### WE HAVE A BRUSH FOR THAT...

Whatever the job, Norton have the perfect wire brush for it. From simple sanding to those trickier tasks, our comprehensive product range has been specially formulated to meet any DIY challenge.

The product range and packaging have been designed to simplify the consumer's choice and remove the need for in-store POS explanations, reducing redundant shelf space.

### MORE...

#### COMFORT

Norton drill brushes have a hexagonal shaft, which makes for a more secure fit in the drill chuck and fewer vibrations generated when in use. Overall, this provides a far more comfortable experience for the operator. The bi-material hand brushes feature an anti-slip, ergonomic handle that feels secure in the hand and gives the user far greater control over their process.

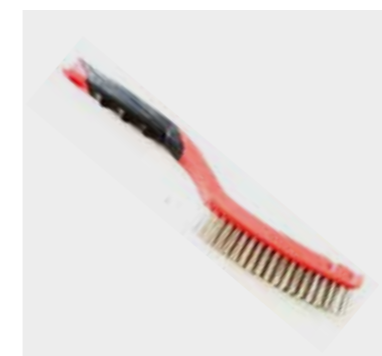

#### QUALITY

When you buy a Norton product, you can rest assured that it has been manufactured to the highest quality standards and will deliver exceptional performance every time. All Norton brass wire brushes are made from 100% high quality brass fibres, for long lasting and effective performance throughout the life of the brush.

When working with stainless steel, you should select a brush with stainless steel wire. This will prevent contamination and discoloration of your workpiece.

#### SAFETY

Our premium range of brushes now feature a protective guard that shields the user from flying debris, dust and particles generated when in use. The guard also makes the brush easier and more comfortable to handle.

### MORE SIMPLICITY

Understanding the pack

- 1 Stage and application
- 2 Attachment type
- 3 Dimensions
- 4 Type of brush
- 5 Level of hardness

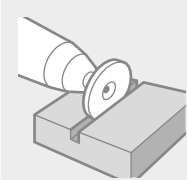

- 1 Stage
- 2 Surface of application
- 3 Suitability
- 4 Tip
- 5 Rotation per minute
- 6 Safety pictos
