

NORTON

SAINT-GOBAIN®

FAST AND TOUGH MEETS SMALL AND MIGHTY

Save time, labor, and money. Norton Mini Flap discs eliminate the conventional 2-step process in grinding edges and removing welds and rust. The abrasive technology used in the Norton mini flap discs combined with the layered flap design wears away evenly, producing a high quality and consistent finish.

FEATURES AND BENEFITS

- Durable polyester flaps improve life, grain retention, and wear evenly creating a more consistent, better finish with a cooler cut increasing the bottom line
- High strength plastic back design is lightweight and absorbs vibration allowing for greater control and technician comfort improving productivity
- 2" and 3" diameter discs get into hard to reach areas and allow for easy storage while maintaining required cut and life
- Can be used on high speed die grinders responding to the demand for smaller, ergonomically-friendly tools that require less effort, while delivering better results

- Latest-generation ceramic alumina abrasive provides 50-200% longer life vs. any flap disc on stainless, titanium, and super alloys
- Supersize grinding aid provides a cool, noticeably faster cut rate
